

Summer 1995

## The new Macintosh Ham Test Simulators are HERE!

Novice Ham Test 5.0 SA.sea  
Technician Ham Test 5.0 SA.sea  
General Ham Test 5.0 SA.sea  
Advanced Ham Test 5.0 SA.sea  
Extra Ham Test 5.0 SA.sea

The latest versions feature:

HyperCard 2.3 as a **stand-alone application** (SA) eliminating the need to have HyperCard. All you need is a Mac with 4 Meg of memory and version System 7 or greater.

Each version 5 Ham Test Simulator has the **latest questions** as prepared by the Question Pool Committee.

Each Ham Test Simulator is **FREE OF CHARGE** and work the same way as the originals written by Diana, KC1SP.

You may obtain a Ham Test Simulator by mailing me a \*FORMATTED disk (1 per test) and include a Self Addressed and Stamped disk mailer for the return.

Each Ham Test Simulator is also bundled with a shareware CW program called MacMorse 1.4 written by Doug, WB0EON.

Also included are a collection of text files that relate an interesting variety of ideas about the best way to study CW and prepare for tests.

If you load these onto file servers where others can gain access via Internet, please let me know so we can point others in that direction.

Your comments and suggestions for future versions are always welcome. Stay in touch and good luck with your next test!

73,
