Vertigo's 3D Tools Bring Designers into the Next Dimension

VANCOUVER, Canada—Vertigo knows 3D. They've been around for the past ten years creating unbelievably cool 3D software for the feature film, film special effects, broadcast, animation and visualization industries. Used by the best in the biz, including Time Warner, Disney, Sony, CNN, Electronic Arts, BBC and MTV, Vertigo's feature film title credits include *Escape from LA*, *Congo*, *Ace Ventura II*, and *The Santa Clause*.

Vertigo has distilled their 3D expertise and technology into a series of easy-to-use 3D tools designed for everyone new to

3D graphics. Vertigo's tools help digital designers create cool 3D effects and bring 3D into their designs with the click of a mouse — and no learning curve.

"I wanted to add 3D effects to my designs to keep ahead of my competition and impress my clients. Vertigo's 3D tools work with my favorite apps and I didn't have to spend hours with a user manual." said Melissa Sanders of In Time Design Inc.

Vertigo products are developed for the Windows 95, Windows NT and Power Macintosh platforms and are available from your favorite reseller. Visit Vertigo's website for more information about their 3D products. Vertigo. Because life is 3D.
