CONVERT

Convert utility is designed to provide a means of conversion of numbers from one unit to another. The conversion factors and descriptions are programmable so allowing complete flexibility in tailoring the calculations to suit your requirements.

All amendments to the conversion tables can be stored and will be automatically recalled when the program is next used.

Printing Conversion Formula

The full list of conversion formula can be printed by selecting the print option from the File menu of CONVERT.

Add Conversion

Used to add a new conversion factor to the conversion table.

From Units

Enter the units symbol of the units to be converted FROM. For example: Yds for Yards, cm Centimetres etc.

To Units

Enter the units symbol of the units to be converted TO. For example: Yds for Yards, cm Centimetres etc.

Description

Enter a description of the conversion that will be actioned. For example: Yard to Metres

Conversion Formula

Enter the formula to use in the conversion process. Note that one variable is allowed for input and is denoted by the letter X. All standard mathmatical symbols can be + - * /
Parenthesis can be used to group elements of the formula.
Example
((X*(5/9))+(32))

Add Button

Click on the add button to add the entered conversion details to the conversion table.

Clear Button

Use the clear button to remove any input from the fields. The clear button will not update the conversion table.

Exit Button

Use the Exit button to return to the main Convert screen

Edit / Delete Conversion

The two functions are closely related. The EDIT function is used to alter a conversion formula by over typing the existing data. The DELETE function removes an entry from the list.

Prev Button

Display the preceding conversion data. Listing scrolls around the list, so the last entry in the list precedes the first.

Next Button

Display the next conversion data. Listing scrolls around the list, so the first entry in the list is 'NEXT' to the last.

Action Button

In the case of EDIT it applies the changes made. For DELETE the entry is removed from the conversion list.

NOTE: Changes are not saved until the program is exited.

What is Shareware

Shareware is the term given to software that can be freely distributed to anyone for evaluation purposes.

Shareware is NOT FREE. It is provided freely for the sole purpose of evaluation prior to purchase. Normally shareware software is fully working in every respect however sometimes it has restricted functionality which is restored on registration.

Shareware programs must be registered within 30 days or removed from disk and either passed on or erased. Continued use after this time is taken as agreement to the registration and the full amount becomes due.

Why Register?

Registration of shareware software entitles the registered user to support and update information concerning the product. It may also ensure a more recent release of the software including improved or released functionality. Documentation may also be available to registered users.

Registering Your Copy

Registration costs only US$25 and entitles you to WORLDWIDE support via CompuServe. You will be advised of product updates and enhancements when they become available and will be kept in touch with other Premier products as they are released.
