BUSINESS NOTEPAD E

#####

WELCOME TO THE PAD!!!

Version 1.2 December 31, 1983

#####

This Lotus worksheet is a menu-driven worksheet which I designed to provide access to various notepads containing pages of tasks to be done, telephone numbers, business notes and other notes. This spreadsheet provides the capability to print and/or view selected pages and search several telephone directories for a phone number based on your entry of

Sheet1

a name to look up. "The pad" does not provide the capability to search pages of text for words within paragraphs because this capability does exist in the current 1A version of Lotus.

Press PgDn Key To Continue

I would welcome any comments about this program or suggestions on how to improve it. You may contact me at:
