

Range Name	Command language	Comments
\U	{type}c{menu}fs{menu}	switches to a COMM window invokes file-transfer send waits for a RETURN
\D	{type}c{menu}fr{menu}	switches to a COMM window invokes file-transfer receive waits for a RETURN

These short routines provide a shortcut for uploading and downloading with XMODEM.

TO DOWNLOAD: Once you have selected a file for downloading from the remote computer, press the ALT and D keys. You will then be presented with a Symphony FILES window. Pick an existing file or enter a new filename and filetype, and press RETURN.

TO UPLOAD: Invoke the file-transfer program on the remote computer, and press the ALT and U keys. You will be presented with a Symphony FILES window. Select a file for transfer and press RETURN.
