1.63 Hilfe

Information

In dieser Ausgabe mußte das automatische Entpacken der Programme entfernt werden. An einer für alle angemessenen Lösung wird bereits gearbeitet. Leider war die aktuelle Lösung die wir hatten noch nicht ausgereift genug.

Das Inhaltsverzeichnis hilft Ihnen auf eine sehr schnelle Weise das gewünschte Programm zu finden.

Inzwischen lassen sich die Programme direkt aus dem Inhaltsverzeichnis entpacken. Alle Programme werden ins Ram: entpackt. An einer etwas besseren Lösung arbeiten wir noch.

Alternativ können Sie auch das Programm "Unarc" benutzen. Seit Os3.9 ist das Programm Bestandteil des Betriebssystems.

Wir haben auch den LHA-Entpacker und die Gui-Packmaster beigelet, auch damit ist ein komfortables entpacken möglich.
