Information

Battle at Washuda

You have to eliminate a Washudan capital ship.

Play this mission on easy level first.

There will be a lot of ship,so if you have a slower machine,try to decrease performance.

Forgive me for the errors of the briefing or spelling.Please write me your reviews.

Battle For Sol

In this mission you have to destroy  
three Demon class destroyers before  
they depart and destroy Earth's  
planetary defenses, in other words  
you're Earth's last hope. I designed this  
mission as kindof a pre-mission to the  
last mission for the Main Freespace  
Campain.

If you have any sugestions please  
e-mail me.

Big Boys Come To Play

The Vesuvian cruiser Poiniard has  
been attacked by the Shivan Demon  
class cruiser Watooka. Alpha wing  
is sent in with a little bit of help to  
save the Poiniard, HOL makes an  
appearance also.

#### Battle of the Black Sea

This mission is designed to be a  
rather larg one that could bog  
down slower machines. Although  
how so is unknown. The mission  
pushes FRED to the max with 49  
ships for most of the mission. The  
respawn is set rather high to give  
around 15 to 20 minuets of dog  
fighting. There are at least 10 capital  
ships all invalved in the fighting,  
so again this may slow down on  
some people's machines.

#### Behind Enemy Lines

The GTA has decided to capture an  
important and strategic system: Regulus.  
In this mission you will assault a Shivan  
repair and rearming depot and prevent  
some ship from escaping.
