SAS/C is Copyright © by SAS Institute, Inc.

## 1.3 Introduction to Window2Front

### Introduction

Window2Front is a tool that grabs a window and puts it in front of all the other ↔ ones.

So why another 'window to front' tool ? Well, sometimes I just wanna make ↔ something, no matter what.

---

This small util does it's job by selecting a hotkey.

Selecting the hotkey again automatically gets the next and the reverse hotkey the ↔ previous window.

And as this program is a commodity, you can change the hotkey by changing it in ↔ the icon and quit it when starting twice.

Default hotkey: CTRL, Y.

Default reverse hotkey: CTRL, SHIFT, Y.

---

This program handles a list up to 30 windows, which should be quite enough.

But if that's not enough for ya, let

me  
know.

## 1.4 Requirements for Window2Front

### Requirements

Window2Front requires an Amiga with KS2.04+ and commodities.library installed.

## 1.5 Window2Front History

---

## History

V0.01 09/12/2003 - Made the foundation.  
V0.9 19-23/07/2004 - First version ready for release.  
V0.9b 02/08/2004 - Some small fixes.  
V0.9c 04/08/2004 - Some more changes.  
V0.9d 20/08/2004 - Added the reverse hotkey (+ little rewrite).

## 1.6 Todo in Window2Front

### Todo

- Well ???

## 1.7 ToolTypes

### ToolTypes

Window2Front has just a few of tooltypes:

HOTKEY: Set a hotkey for next window. Default = CTRL Y  
REV\_HOTKEY: Set a hotkey for previous window. Default = CTRL SHIFT Y  
CX\_PRIORITY: Sets the priority.

## 1.8 The Author

### The Author

Window2Front was written (with CED) and tested by Michel 'DMX' Bagmeijer, on a A1200 '060/50Mhz & 603E+/240Mhz 64MB with SAS/C.

If you have questions, remarks, suggestions, wishes & bug reports, contact me:

Michel 'DMX' Bagmeijer

## 1.9 Bugs, Ehhhhhhhh :(

### Bugs

- Not at present time.
-

## 1.10 A few words

Thanks

I would like to thank:

Amiga, Inc. & KMOS, Inc for the ongoing dream called "Amiga"  
Jim Krab for additional help (borrowing his monitor).
