### 1.2 Introduction

---

---

I N T R O D U C T I O N

---

---

---

-----

Passcode is a program in which the user has to enter a password to close the program and therefore continue in what her or she is doing. This programming would be good to keep a annoying family member messing about with your work, just double click on Passcode's icon and lock up!

Passcode requires you to enter the password and username with capital and lower case letters in all the right places!

## 1.3 Requirements

---

-----

R E Q U I R E M E N T S

---

-----

Passcode requires nothing more than an Amiga as far as I know, please let me know if you can't use it!

## 1.4 Legal Stuff

---

-----

D I S C L A I M E R

---

-----

This program has been tested by a number of people including me, I understand that this file should work and not damage your computer setup or equipment, but I CANNOT be held responsible for HD muckups or any other setup/equipment or program muckups.

## 1.5 Installation

---

-----

I N S T A L L A T I O N

---

-----

---

If you plan to use Passcode alot it is best to copy it to your HD or Workbench disk, to do this open a shell and type:-

```
"Copy Nicron:Passcode-V1.0/Passcode C:"
```

Now, when you want to use it you just type Passcode into the shell, or you could Put Away the Passcode icon so you can use it from the WB screen.

To load Passcode when you boot your computer install as above and add a line to your user-startup reading:-

```
"C:Passcode"
```

## 1.6 Usage

---

-----

U S A G E

-----

From Workbench:

Double click on its icon and enter a username and a password, then click on "Go!" to lock out!

From CLI or Shell:

Either type Passcode at the prompt or use the default arguments for the CLI which are:

```
"Passcode [Username] [Password]"
```

Remember, Passcode requires you to enter the password and username with capital and lower case letters in all the right places!

## 1.7 Erros/Bugs

---

-----

E R R O R S / B U G S

-----

As far as I know Passcode is error free, E-Mail or write to me if you know otherwise

## 1.9 Future Plans

---

-----

F U T U R E P L A N S

---

In the future I hope to have a memory of many users so each user can log on with different passwords and names, but this will be disabled when Passcode is not run from the CLI
