# Mathematics For The Rest of Us!

## Expressionist 3.0

Equations Made Easy!

NEW Version!

Expressionist 3.0 is even more customizeable and intuitive than it's previous industry leading version. It is a powerful application and desk accessory that allows technical equations and symbols to be quickly and easily created and then placed into your word processor, page layout, or presentation documents. It is System 7 savvy, and has many new features!

Theorist 1.11

Symbolic Mathematics.

Theorist is an interactive symbolic math and graphing program with a graphical user interface that makes mathematics easy-to-do on the computer. It is powerful enough for the advanced scientist, engineer, and educator, yet intuitive enough for the beginning student.
