

To run John & Rob's Multimedia Kaleidoscope requires a great deal of multimedia horsepower. In addition to a fast machine, and a sound card you should certainly have a fast VGA card. Below is a list of the hardware requirements to run the Kaleidoscope.

DOS 5.0 with 520k+ free memory.
EMS memory manager with 500k free EMS memory.
486 25mhz or faster.
386 40mhz or faster.
Fast VGA card.
SoundCard

Type 'JROB' to run the Kaleidoscope.

**** UPDATE NOTICE ****

If your MIDI device or sound card is at something other than the default base address, run MPATCH to patch the MIDPAK driver to that new base address. You still configure your digital sound driver through the normal setup program.

John & Rob's Multimedia Kaleidoscope is interactive art. It incorporates all of the aspects of multimedia in an engaging interactive environment. The Kaleidoscope is meant to be an active experience. You control the visual and audio effects, and in this fashion are an active participant in this work of art. Be sure to go to the help screen ('H') and discover all of the keys to controlling the Kaleidoscope's many visual effects.

Every time you bring up the Kaleidoscope it represents a new experience. Be sure to use the different texture map modes ('T') and different mirror modes ('M'). There is no limit to the number or variety of visual and audio effects you can create with the Kaleidoscope.

The Multimedia Kaleidoscope was created by computer game author John W. Ratcliff (688 Attack Sub) and game musician Rob Wallace (The Miracle Piano System). We are proud of what we have been able to achieve. If you enjoy the Kaleidoscope and would like to receive a full version, with music and sound effects for all six Realms, plus an audio-tape production of the original Kaleidoscope sound track (as performed on the Roland Sound Canvas)

send a \$40 check, payable to 'Wallace Music & Sound' to:

Multimedia Kaleidoscope
Wallace Music & Sound
6210 West Pershing Ave.
Glendale, AZ 85304

The Kaleidoscope will come on 2 high density 3 1/2" MS-DOS diskettes.

If you have problems with this version of the Kaleidoscope please feel free to call my BBS 'SoundBytes OnLine' at 314-939-0200 and leave e-mail to 'Sysop'.

Thanks, and enjoy,

John W. Ratcliff
