

Sound Forge 2.0 Demo Release

The Sound Forge 2.0 Demo contains all the features of the Sound Forge 2.0 package except for two things:

- 1) You can't save files.
- 2) You can't paste to other applications via the Windows Clipboard.

To really get a feel for the advanced features of Sound Forge 2.0 we highly recommend you take the time to read through the included help files.

Ordering Information

Sound Forge 2.0 is available directly from Sonic Foundry for \$179.00.

For pricing and availability on all Sonic Foundry products please call or write to:

(608) 256 7300 (FAX)

Media Vision Pro Audio 16 Users

If you experience occasional noise problems while playing 16 bit stereo files and you own a Pro Audio 16 you will need to disable preloading by performing the following steps:

- 1) Choose the Wave Devices option from the File Preferences menu.
- 2) Disable the Preload All option by unchecking the Preload All check box in the Wave Devices dialog.
- 3) Select OK to save the change.
