Remember you can also view by categories if you prefer!

1.10 100

Title : Atomic II
Author : Andrew Heckles
Number : F1-100
Disks : 1 Disk
Info : Works on any 1meg+ Amiga.

Description :

This is a splendidly simple and fun puzzler. Simply set up a sequence of switches and guide coloured balls to their correct homes. It's quite easy at first, which is what makes it so addictive, but gets to be a real challenge later. 100 levels with password support. A nifty little game suitable for anyone of any age.

CLICK Click to Run This Program
CLICK Disk Information
CLICK Click to Un-DMS This Disk

Note: You will not be able to return to this menu if you run the game.

1.11 099

Name : GRAC USER DISK #1
Author : Edmund Clay
Number : F1-099
Disks : 1 Disk
Info : Works on any 1meg+ Amiga.

CLICK to link to G.R.A.C.

Description :

This disk is an absolute MUST for anyone who has bought Grac (F1-066 or FG1) The disk is by Grac author Ed Clay and contains an in-depth step by step tutorial for making a game, with lots of new copyright free graphics & music for you to use in your own Grac creations, another new Main character

animation, a frequently Asked Questions section, a bug report on V1.0 of Grac and how to get around them and of course another sample game. Brilliant. If you want to see more Grac user disks buy this!

CLICK Disk Information
CLICK Click to Un-DMS This Disk

1.12 098

Name : GONKS
Author : Lee Wilson
Number : F1-098
Disks : 1 Disk
Info : Works on any Amiga.

Description :

This is an excellent game, its a sort of cross between Lemmings/Troddlers and Lost Vikings. The idea is to arrange blocks & scenery items like ladders & steps in such a way so that the Gonk or Gonks can get home safely. This all has to be done within a time limit of course and you get to use explosives and things to make things even more fun. Gonks has good Lemmings style graphics and music, has 40 levels and 3 worlds (Lego World, Jungle world and Tiler world) Very good fun and addictive, gets the old grey matter chugging after a few levels. Password feature ensures you don't have to redo the same old levels time and again. A worthy F1 title.

CLICK Click to Un-DMS This Disk

1.13 097

Name : THE ULTIMATE QUIZ Vol #2 DATA DISKS
Author : Andy Gibson
Number : F1-097
Info : REQUIRES THE ULTIMATE QUIZ VOL 2*
Will NOT work with F1-060 Ult Quiz 1.

CLICK to link to Ultimate QUIZ V2
CLICK to link to Data Disks #1

Description:

Great value, Andy has decided to release two more data disks. In case you are wondering the data disks hold 500 questions as that's all the questions that can be run in THE ULTIMATE QUIZ in one session.

SPORT DATA DISK:

Virtually every aspect of sport is covered in 500 questions and multiple choice answers, these will be quite a challenge for the average sporting

buff.

POT LUCK DATA DISK: 2nd edition

If you are into general knowledge, this disk is for you - 500 new random questions each with three answer options to choose from. The questions range from easy to hard and should be challenging even to the greatest quiz buffs.

More data disks coming soon, maybe?

1.14 096

Name : MAGNETIC FICTION

Author : Andrew Campbell +others

Number : F1-096

Disks : 1 disk

Description :

Here us something different for you. This disk is a massive collection of Horror/Shocker stories, all written by very talented up and coming authors. Andrew is trying to pioneer a new breed of software with MF and he has done an incredibly good job with the content and presentation. The disk is 100% full and contains no less than 29 stories ranging from just spooky to far out blood curdling shockers. The presentation is superb, with each story having it's own cover illustration and a very easy to use interface. There are lots of settings to twiddle with like fonts and colour etc. To suite everyone's vision. Many months of hard work by quite a few people has gone into the making of this disk and I think it deserves success. MF is hard disk installable.

* * WARNING * *

Some of the stories in MF contain explicit language and sexual scenes. The authors have voluntarily rated MF (15) Not suitable for anyone younger than 15 years old.

Although we [F1] are very particular about taking on anything offensive we feel that the use of language and sexual depiction contained in MF are not exploitative or gratuitous. MF contains nothing more than you can read in off-the-shelf books from W.H.Smiths. But please be aware of the content and if you are easily upset or offended then please do not run/extract this disk.

1.15 095

Name : GAME MUSIC 2
Author : Mike Richmond
Number : F1-095
Disks : 1 Disk

CLICK to link to Game Music #1

Description :

This fantastic disk contains 11 music modules for you to use in your own productions. The music has been especially and exclusively composed for F1 by Mike Richmond, who is a well respected and sought after musician and has written scores (no pun intended) of tunes for many P.D and Licenceware titles. Just as with Steve Gane's disks (see F1-044) all Mike asks is that give him credit for his work in your product. The disk is split into catagories such as Main themes/High Score Table/Win/Lose etc. All the tunes are of commercial quality and will work in most programming enviroments, including Amos.

* After you have finished listening to a tune press ESCAPE to stop the tune before loading another. *

Description :

Amoszine is THE ONLY remaining Amos dedicated disk mag left, it has survived because of it's excellent content and quality. Weather you are an expert or beginner Amoszine has something for you. Learn coding tricks from the experts, get all the latest news/reviews from the Amos scene stacks or articles and of course the ton of useful source code (archived) that comes with every issue. The Amos coders bible, without a doubt. (Major contributors to Amoszine get it free, by the way.)

AMIGA SHOPPER SAID:

"The interface is very attractive and easy to use. Overall, I was impressed with the amount of work that had obviously gone into making "Amoszine". Most importantly, it seems to be supported by a lot of talented and enthusiastic Amos programmers." DEC 94 (Issue 3)

C.U AMIGA LIKED IT TOO:

"THIS DISK IS AN ABSOLUTE MUST FOR ALL AMOS FANS"
"ITS EASILY THE BEST AMOS FANZINE"
"AN UNSUNG HERO OF THE AMOS WORLD"

1.17 093

Name : ZONAL WAR
Author : David King
Disks : 1 DISK
Number : F1-093

Description:

This is a direct copy of a Spectrum classic strategy war game called War Zone. It is extremely simple to play, but furiously addictive, like all of Daves games are (see 92 and 21). The game is set over 9 sections and you play the computer taking turns to strategically move your men and armour and basically destroy the enemy, such is war. It's a very clever little game and the gameplay superbly crafted, just as the Spectrum version was. A nice touch is the 'Air Attack' you are allowed once each turn. Sound samples are used to good effect.

1.18 092

Name : PREMIER LEAGUE
Author : David King
Disks : 1 DISK
Number : F1-092

Description :

If you know of a PD game called Premier Picks you already know what this game is about. The author wrote this clone because he was sick of Premier Picks crashing on him all the time. Premier League is a fun football game, using a blend of skill & chance, you must take your selected team to the top of the league. Each match's highlights are decided by selections of cards on whether you score a goal, give a penalty away or a free kick etc. The skill bit is trying to remember the positions of certain cards. It sounds drab, but I bet you have never played a more addictive fotty game or had so much fun. Premier League is simple and fun, that's the best way I can sum it up.

1.19 091

Name : D.M.C (The Disk Mag Creator)
Author : Andy Gibson
Disks : 2 DISKS
Number : F1-091

Description :

DMC can be used by anyone who wishes to release catalogue disks, disk mags, letter disks etc. Your own graphics, sounds and text files can be used and the whole thing will become your very own personal utility. You can then freely spread your production to anyone who wishes to use it. Charge whatever you like! Release it via PD/Shareware/Licenceware. For those of you who have ever wanted to produce magazines or even catalogue disks for your PD library, then DMC is the program for you. So much so that some major PD libraries already use DMC for their catalogue disks. Disk magazines are already being produced with older versions (PD) of DMC such as Moviezone and many others. This newly written, exclusive F1 version features loads more professional features such as Split Screen articles (a la' grapevine) and the ability to toggle the colours on/off for articles etc.etc. Not only has DMC been re-written from scratch, but a NEW improved Article Tester has been re-written as well. This new version can be used not only to view your

articles, but to convert them to many DMC formats and even to uncrunch files packed with Crunch-Mania. I have even kept DMC compatible with 1.3 kickstarts so everyone can benefit from using your productions/releases created with DMC. The two disks that come supplied with this release contain everything you will need to get you on your way to creating your own customised disk magazine with as little work and fuss as possible.

Name : PUNTER V3.0
Author : Steve & Belinda Bye
Disks : 1 DISK
Number : F1-090
Info : **NOT A500**

CLICK to link to Punter v2

Description :

Punter is a horse racing game for 1 to four players. You can play Punter just for the fun of betting on horses and winning money or you can play it as a serious racing simulation, studying the detailed form generated for every horse and every race. The game is far too involved to go into too much detail here but here are a few of the features:

- *Form database of last 14 races of EVERY horse in EVERY race
- *Form covers Course, distance, going, age, weight, odds, trainer, jockey
- *Four types of bet, Win, Each way, Straight Forcast, Reversed Forcast
- *1 to 4 players. 2-4 player games have five different game types that you can decide on eg: First to win a million, play till one player left etc.
- *View Actual animated race and cheer your horses home
- *Buy and sell horses making huge profits (or losses) and winning prize money
- *Load and save game positions for those marathon games.
- *Ask "Form man" to analyse the form and give you his tip and WHY for the coming race (at a price of course)
- *Take out massive loans
- *Hire jockeys to ride the horses you have purchased for a single race or get a retainer on him for a whole season.
- *Jockeys have their own form table you can study to find the men in form.

Etc. etc.

V3.0 enhancements:

- * now HD installable. Will run from anywhere
- * Animated title screen
- * Cut out difficulty levels (As didn't work very well)
- * Improved presentation on racecard
- * Pay loan off, press R.
- * Now has 3 tipsters (Form man, TV Tipster & Dead Cert)
- * Better save/Load can now have as many saved games as like.
- * Absolute ton of little errors corrected
- * Next player now supports right mouse button to go back a player as well as forward in case someone forgot something. (Cheers Arnie)
- * Added/new game over screens
- * Putting your money on bets is now a lot quicker, moves in 100s and 10s using left/right mouse button.
- * Full Amos source code now included.
- * Probably some other small things I forgot.

* RATED 79% by The One, March 95 (v2.0)*

"I am really surprised how much I liked Punter, because I am not even interested in racing"

1.22 088

Name : GHOSTSLAYERS
Author : Andrew Heckles
Disks : 1 Disk
Number : F1-088

Description :

Ok, hands up who played the original Ghostbusters game on your C64/Spectrum? Go on admit it, it was fun and it was good. In fact it was one of the most succesful 8 bit releases ever. Ghostslayers is an unashamed rip-off of that game (but with more colours of course) It still retains the essential gameplay. Basically you open a business account, buy a car and equip it with all the ghost busting weapons you can, drive around town looking for ghosts, nip into buildings and kick ghost-butt, catch the ghosts in your ghost traps and take them back to HQ. Once the cities "PK" level has reached 1000 you have to tackle the Gatekeeper and the keymaster etc. you know the score. Who needs a spectrum emulator? At least this one runs at a good speed.

1.23 087

Name : TELE-TITLE 2
Author : John White
Disks : 1 Disk
Number : F1-087

Description :

TT2 is an easy to use video titling program for all you Camcorder/Genlock owners. If you don't know much about these things then you are in the same boat as I am. Suffice to say I have been told this is a brilliant program with tons of features. TT2 was previously released as Shareware, but this is a newer updated FULL version which also includes the Amos source code, in case you want to tinker with it. Over to the author: Tele Title 2 is an easy to use Video Titler. By easy to use I mean EASY TO USE. You simply choose a Title from the main menu and TYPE - Not Cut & Paste like most other titlers - up to 3 Names for that title. You keep doing this until you've typed in your sequence. You then simply press Play and your sequence is played.

Here are its Main Features...

- * Uses Bobs (Cut out Graphics, Letters, etc) instead of Fonts so that you can have graphical characters, with upto 64 colours, in your sequence.
- * The Sequence is in 3 Parts - Picture, Cast and Titles & Names - so that you can switch Off/On the Picture and/or Cast. Good if you don't need a Cast in your film for example. Perhaps it's a Documentary?

- * Depending on which Sequence Method you use your sequence could Scroll Horizontally or Vertically, Fade In and/or Out, be displayed OVER a Picture, be displayed One Character At A Time, etc. Most sequence methods allow you to do more than one thing.
- * You can Change the Titles on the main menu, Load/Save those titles, Load/Save a Cast, Load/Save a Sequence, Position your sequence Anywhere on the screen or use Auto-Centering, Time your sequence (Good for use with Title Music), Edit the Colours in your Sequence, Erase your Sequence from memory (Good if you are low on memory), Position the Screen Display, Use Pauses and Wait times to get an evenly timed sequence, Switch Off/On Multitasking, thus, improve the smoothness of a scroll even further, etc etc....
- * Supported Resolutions (Screen Modes)...

Low - 320 x 256
 High - 640 x 256
 Low Interlaced - 320 x 512
 High Interlaced - 640 x 512
 Low Overscan - 368 x 290
 High Overscan - 736 x 290

1.24 086

Name : LEGIONS OF DAWN (HARD DISK VERSION)
 Author : Andrew Campbell
 Disks : 2 Disks
 Number : F1-086
 Info : * REQUIRES AMIGA A1200 or A4000 *

Click [for floppy version](#)

Description :

Legions Of Dawn is the final (& best) game in the Black Dawn series, and F1 are proud to have the EXCLUSIVE rights to distribute it. The previous games in this series were: Black Dawn (PD), BD Special Edition, & Black Dawn II (Shareware). LOD is the final result of Black Dawn. It has been written and vastly playtested & improved over the past 2 years, many, many people (20+) on the 'scene' have helped out in its production, so you can be assured that this game is honed to perfection.

Legions Of Dawn is a mega-atmospheric single-player 3D roleplaying game viewed from first person perspective - in other words as though you are 'inside' the game world and viewing it through your own eyes. The various futuristic constructions that you must attack and defeat are represented by complex maze-like networks, composed of corridors, rooms, doors, computer terminals... a whole array of exciting and fully interactive elements. In a

nutshell, its a kind of Doom clone with tons of gore and atmos, navigate through the corridors wasting all the bad dudes and collecting more powerful weapons/cash/goods, logging on to computer terminals and generally being a very bad person, then make your way to the exit.

The game comes with an on-disk 'novella' (Book to you and I) telling the whole story of LOD which is superbly written.

Legions Of Dawn is best played in the dark, and with stereo speakers rigged up to your amiga. If you have anything less than a standard A1200 you won't get the best out of the game. Due to large amounts of blood, gore and general unpleasantness, I would recommend parents to keep younger children away from this game.

Earlier Black Dawn versions gained ratings of 90-96% in the magazines.

1.26 084

Name : WORD PLUS+ PROFESSIONAL V1.3
Author : R.Butler
Disks : 2 Disks
Number : F1-084

Info : **UNTIL RECENTLY SOLD AT £14.95**

Description :

Word Plus+ Pro is a program intended for use as an aid to solving/creating word puzzles, crosswords, etc. The program is supplied with a dictionary of a massive 75000+ words that the program will search when solving a particular puzzle. We believe this package to be the most powerful of its type, but don't take our word for it. See for yourself how quickly the program searches the dictionary on each of the programs four word puzzle solving options, compared with the other word utilities on the market today. Even on a standard Amiga 500 (with 1Mb of RAM), the searches are performed at lightning speeds.

The package can help you to:

- (*) Solve Crosswords, with you entering the letters you know of, replacing unknown letters with question marks. The program will then search the dictionary for words that match the search criteria, and then display them for you to browse through.
- (*) Solve Anagrams, with you entering the letters you know of, replacing unknown letters with question marks. The program will then search the dictionary for words that are anagrams of the search criteria, and then display them for you to browse through.
- (*) Solve In-Words, with you entering the letters you know of. The program will then search the dictionary for words that contain the search criteria, and then display them for you to browse through.
- (*) Solve Make-Words, with you entering a combination of letters. The program will then search the dictionary for words that can be made using the letters supplied in the search criteria, and then display them for you to browse through.

The program also allows you to add words to the dictionary and can supply you with dictionary statistics. There is an in-built help option included with the program which gives clear, concise information on how to use the various options in the program.

Once a list of words has been generated, you can search for a word in the word list. The word list can also be printed out to a printer, giving you an easy way to enter those word contests, without the slog of having to write the solution list out by hand!

* V1.0 Reviewed in C.U Amiga Nov 94 costing £14.95 *

"Has the BIGGEST dictionary, FASTEST sorting and is DEFINITELY the BEST Amiga program of this type." 85%

Reviewed in Amiga Format Aug 95:

"A boon for anyone interested in word games", " A very handy util that may even make you some money if you enter enough competitions, Recommended."

Reviewed in Amiga Shopper Sept 95

"Certainly lives up to it's claims" "This is one program not to miss" 88%

This new F1 version is version 1.3, and costs just £4.99, speaks for itself!

1.27 083

Name : IMAGE COMPRESSOR
Author : ANDY SMITH
Disks : 1 Disk
Number : F1-083

Description :

The Image Compressor is aimed at all AMOS programmers. It is a simple utility to compress and convert images into different formats. It was written to replace the IFF Compactor that is supplied with AMOS Professional. In my version you can squash and Powerpack ABK images. The main limitation with the IFF Compactor was that you could only convert IFF files to ABK, you couldn't do the reverse. Supports Batch Conversion, allowing you to select many files to operate on in one go. Built in Palette editor supporting Copy/Spread/Swap. Pack as screen or bitmap using Squash or Powerpacker. On Line help, Amigaguide docs and tutorial files. Also includes the Amos Pro source code.

Also included on this disk are two Amos Pro Accs:

BANK MANAGER:

This little utility was written to make games programmers life easier. All AMOS programmers will know that music, graphics and sound are stored in files called memory banks. Before, the programmer had to move and organise all the banks using the direct mode. This program was written with the intention of removing that. Arranging and combining memory banks is a simple matter of pointing and clicking, it should take no time to pick up. Tutorial/docs/Source code included.

INSERT PALETTE:

This is a simple accessory for AMOS Professional that will allow you to insert Palette commands with all the corresponding hexadecimal values into your source code, just using the mouse! This program needs to be executed from AMOS Pro's User menu. When it is selected, a palette editor will appear over your source code. It is then a simple matter to alter the palette and click OK. Tutorial/docs/Source code included.

Name : MAL'S MAP EDITOR
Author : Malcolm Lavery
Disks : 1 Disk
Number : F1-080
Info : * Amos or Amos Pro required to use the example code *

Description :

I wrote this map editor for my own use, and have not stopped using it for all my games since. It can be used for any type of program ie: Puzzle, scrolling, multi level and single screen level games. And as you will see from the examples included on the disk, you are only limited by your imagination!!!!. Obstikle, F1-076 was written using it.

- o Professional user interface
- o Very easy to use
- o Ability to super impose one map on top of another
- o Maps can be any size 1000*1000 screens and more!!!
- o Edit tile values for triggerd tile effects
- o Icon grid and map grid overlay for precise editing
- o Ability to view tile values super imposed onto map
- o Loads of example programs
- o Example tiles and sprites for you to use (copyright free!)

Also!, just to show you the type of game you can use the editor for, I have included, what is just about a full Dizzy type adventure game for you to play and look at.

Name : SUNNY SPELLS
Author : John Knight
Disks : 1 Disk
Number : F1-078

Description :

Sunny Spells is aimed at making spelling for children, both young and old, FUN! To achieve this I have included lots of colourful graphics, two distinctive characters, animation scenes and amusing sound effects. All control is via the mouse. There are 3 age options

3-6 yrs Pictures and easy words.
7-10 yrs Easy words without pictures.
11+ yrs Hard words without pictures.

The object of the game is simply to keep the sun in the sky. To make a guess simply select a letter from the alphabet panel on the right hand side of the screen. Depending on your choice being right or wrong an appropriate short animation will follow. This animation can be switched off at any time during play by selecting the 'ON/OFF' button. I have also included an option within the title screen for the user to load a new set of words and pictures. An extra disk may be made available if there is a demand.

Name : OBSTICKLE
Author : Malcolm Lavery
Disks : 1 Disk
Number : F1-076

Description :

Obstickle is a multi level arcade platform game complete with a full game level editor (edit up to 100 levels).

There's no mamby pamby jumping stuff here!, you have to control a bouncy ball, and bounce him around the many levels collecting sweets and presents

while avoiding many nasties and "obstickles".

- o Brilliantly cute graphics and animations and sound FX
- o Fully controlable options (sound/music/backgrounds)
- o Full level password system (no re-starting at level one)
- o Very addictive (what's the next level like?)
- o Hard disk intsallable (just copy all files across)
- o Something new to challange you on each level!.

* * * Reviewed in AMIGA COMPUTING March 95 issue 84 page 62 * * *

"Nice graphics and nice gameplay make playing OBSTICKLE a thoroughly pleasurable experience"

Description :

Now this game is FUNNY, and I mean FUNNY. Its a Relics/Monkey Island style point n click graphic arcade adventure. I am sure you know what this type of game is like by now! If not see F1-018 or F1-066. Ok the graphics are not exceptional, but you don't notice as you are too busy laughing. This is a genuinely funny game and quite a challenge, its also pretty hard to describe at 3.07 Am!

1.39 071

Name : MUSIC 2 TAB EXCEL v1.61
Author : Kevin Hales
Number : F1-071
Disks : 1 Disk

Description :

If you play guitar and want to pick notes instead of just strumming the chords, or you are a budding Eric Clapton who finds sheet music baffling, then Music2Tab is for you.

Music2Tab converts music notation (sheet music) into guitar tablature (TAB), a special shorthand showing which fret to hold down and which string to pluck, to play the corresponding note. Just place the notes on the staff and they are instantly converted to TAB. Music2Tab allows you to choose where on the neck of the guitar you prefer to play and then calculate the TAB around this preferred fret. Music2Tab Excel v1.61 can store up to 2000 notes per file, which can be saved and reloaded. Supports sharps, flats and natural notes. Manual and auto scrolling music display and it allows you print out the TAB created or save it to a text file. Uses PAL screen mode only.

Music2Tab won't turn you into Gary Moore overnight, but should show you where the notes are on the guitar, and, with practice, The permutations are immeasurable.

Disks : 1 Disk

Click for Vol #2

Description :

Sounds Complete is not just another disk of music, well it is, but the music on this disk has been especially written for programmers who just happen to be writing a Beat-Em-up game. Everything you need is on here all originally composed for this disk. Not only that there is also a suite of sampled sound effects and even some ABK stuff for Amos programmers. This disk is first in a series, next up from Mike will be:

Volume 2 - Shoot 'Em Ups
Volume 3 - Platform Games
Volume 4 - Driving Games

Note: The material on this disk can be used, copyright free only by the original purchaser of the disk, no other payment is required, just give Mike a mention in your game.

1.41 069

Name : GUITAR CHORD DIRECTORY II PRO V5.a
Author : Bob Stanley
Number : F1-069
Disks : 1 Disk

Description :

This one is a highly regarded utility for guitarists. The old P.D versions were the highest rated for this type of program. From what I can gather it displays chord positions on screen for you and also includes other guitar utilities like a tuner and a songbook that displays sheet music of popular songs.

As I know nothing about this subject here is a clip from the doc file, hope it makes sense.

"GCDir2 is a collection of 276 chords displaying a total of 1008 positions (3 or more for each chord).

Chords: Major, 7, Minor, Major 7, Minor 7, sus4, 7sus4, 6, Minor 6, 9, Minor 9, Major 9, 6/9, 7+9, 7-9, Aug, 7+5, Dim, -5, 7-5, 9-5, 11 & 13"

Name : BUBBLE TRUBBLE
Author : Paul Nordovics
Number : F1-067
Disks : 2 disks
Info : * NOT A500 *

Description :

This is not your run-of-the-mill arcade puzzler, its a highly complex game brilliantly executed. Put very simply You have to rescue the "QT'S" from their imprisoning bubbles. B.T is similar in style to Bubble Bobble and if you liked that and games like Rainbow Islands I am sure you will love this. B.T is not for the faint hearted or the very young, its tough, its an adults game in terms of gameplay. B.T consists of 4 worlds each containing 30 levels, its big. There are also bonus screens, nasties to avoid, keys, power ups and bonus letters to collect, huts to visit, and plenty more oddities. Another good feature is the ability to customise the game, you can select 1-9 lives, joystick friction, joystick diagonals, "Gizmo" for when the going gets tough, game speed and save settings. B.T also has password support every five levels. The graphics are good and very colourful with loads of excellent sound effects. Want a challenge? Then Bubble Trubble's your man.

CLICK for GRAC User Disk #1

Description :

Have you played the best non-commercial adventure on the Amiga? (Relics Of Deldroneye, F1-018) Yes? enjoyed it didn't you! How would you like to create your own graphic adventure game similar or even better than Relics? Now, for the first time on the Amiga (and possibly any other computer) F1 brings you GRAC, The Graphical Adventure Creator. What! you can't program? Don't worry no programming skills are needed, though any programming knowledge will be of benefit. you will need a basic understanding of your Amiga though. GRAC supports standard IFF picture files/sound samples and MOD/MED music modules.

This program is a genuinely brilliant piece of software, Don't confuse GRAC with the old Adventure creators that have been about for years, at worst they allowed you to create text-only adventures and at best they allowed text and a still picture. Grac allows you to create Monkey Island/Relics style games with ease. I have personally seen GRAC's inception over the past seven months and Edmund has put a lot of thought and hard work into GRAC. If you can use Dpaint you can create a game. GRAC comes with a

complete game called Lethal Formula written with GRAC to show you what can be done. Also included are plenty of example graphics/animations and a complete step by step tutorial. Grac is the first of its kind and you won't find anything close to it, even commercially.

Just to top it all, Edmund is willing to help any GRAC purchaser out with GRAC related problems if you send him an SAE.

If you are the creative type but can't get to grips with a programming language, GRAC is your saviour. The games you create with GRAC can be released as stand alone programs that you can sell yourself or release into the P.D. F1 would be very interested to evaluate any GRAC games for possible release so send them in. (See "Programmers" doc on this cat disk)

* If you would like a copy of Lethal Formula just send a blank disk and a stamp for a free copy * for all 1 meg+ Amigas *

1.47 063

Name : SPEEDTRIS
Author : David Shattu
Disks : 1 Disk
Number : F1-063

Description :

Speedtris is a Tetris game, as if you couldn't guess! But what makes this one stand out from the crowd the sheer amount of extra options offered, (21 in all) To give you an idea here are a few:

- * 3 game types, Normal/Timed/Challenge.
 - * Select starting level, players can start of different levels if you want.
 - * Set delay (Speed of falling blocks)
 - * Save high score table
- etc...

Speedtris is a 1 or 2 player game, using the mouse/keyboard or joystick. It contained 41 levels and can be played 3 different ways giving a real total of 123 levels. Just in case you have never seen or played a Tetris type game here is a brief rundown:

Randomly chosen blocks of different shapes fall down the screen, you must manipulate the shapes into position at the bottom of screen so as to make complete unbroken lines, when you do that line disappears and you get X amount of points. You continue this until you complete the level or you have so many unused blocks that the screen is full up and you lose a life. Its a very simple and very addictive genre that has had millions of people glued to their Gameboys/Spectrums/P.C's/Amiga's/Atari's for years and will continue to do so, don't miss out!

Name : JUNIOR ARTIST
Author : Gina Mears
Disks : 1 Disk
Number : F1-062

Description :

This is a really excellent piece of software, similar in many ways to our top selling Art School. JA beats Art School in the simplicity stakes, its just so very easy to use, even for a toddler. Art School is one of the best of kind but is for slightly older children with its wealth of features, this leads to a lot of confusion with the very young, this is the gap JA fills.

Features:

* Silly Spots * Fountain * Grow Circle * Grow Square * Flakes * Fan Draw *
 * Treble Line * Sym draw * Patterns * Freehand * Fill * Line *
 * Load/Save * Circle * Spray Can * Filled Sq * Filled Circle *
 * Load/Save Lock

+ 14 great looking built-in pictures to colour in
 + 8 built in picture patterns to colour in
 + A wealth of built in brushes to construct pictures with including, houses
 animals, scenery, etc.
 + Very simple text insertion, click on a letter and then paste it to the
 screen.

Etc. etc.....

If Art School was a bit too complex for your child you now have the answer!
 We rate Junior Artist's age range at about 3-7 years.

* * RATED 75% A.U.I APRIL 95 * *

* * RATED 90% Amiga Shopper July 95 * *

"Its not only easy to use, but sure to hold your childs interest."

"Its rare to find a PD (sic) program that comes close to its commercial
 rivals and rarer still to find one that matches them , but that's exactly
 what we have here."

"Put simply J.A is the best £4 you could spend on PD (sic) software"

Name : CAPTAIN CARNAGE-ALIEN EXTERMINATOR
 Author : Dan Reynolds
 Disks : 1 Disks
 Number : F1-061

Description :

An indestructable alien vessel is heading for earth and only one person can
 stop it- Captain Carnage, the legendary Cosmic Commando.

If you have played Alien Breed then this game will be familiar territory.
 You must guide Cpt C around the three HUGE levels of alien infested mayhem,
 shooting everything that moves and collecting a variety of pickups.
 Obviously there are computers to be accessed and these allow a number of
 different items to be purchased, including 5 different weapons and a number
 of accessories. You'll need them as the aliens are pretty well defended
 themselves. Obstacles to avoid are:

Alien transporters, 2 types of gun battery, life drainers, mines, energy

doors, auto defence etc.

Rise through the ranks to try and become Star Marshall!

Features include:

-Fast, smooth flip-screen/bi-directional scrolling

-25 fps update

-Level password access

-Savable Hi-Score table

-A variety of different graphics/backdrops

-Explosive sound effects.

The Cpt will keep all you Alien Breed fans happy for quite a while!

CLICK for Punter V3

Description

Punter is a horse racing game for 1 to four players. You can play Punter just for the fun of betting on horses and winning money or you can play it as a serious racing simulation, studying the detailed form generated for every horse and every race. The game is far too involved to go into too much detail here but here are a few of the features:

- *Form database of last 14 races of EVERY horse in EVERY race
- *Form covers Course, distance, going, age, weight, odds, trainer, jockey
- *Four types of bet, Win, Each way, Straight Forcast, Reversed Forcast
- *1 to 4 players. 2-4 player games have five different game types that you can decide on eg: First to win a million, play till one player left etc.
- *View Actual animated race and cheer your horses home
- *Buy and sell horses making huge profits (or losses) and winning prize money
- *Load and save game positions for those marathon games.
- *Ask "Form man" to analyse the form and give you his tip and WHY for the coming race (at a price of course)
- *Take out massive loans
- *Hire jockeys to ride the horses you have purchased for a single race or get a retainer on him for a whole season.
- *Jockeys have their own form table you can study to find the men in form.

Name : COLOUR MATHS
Author : Nils Magnor Stolen
Disks : 1 Disk
Number : F1-057

Description :

Written by the headmaster of a Norweigian school for its pupils, Colour Maths has been tested and approved by HUNDREDS of children. This program has been converted to English exclusively for F1 Licenceware. Colour Maths is basically very simple. The child is presented with a number of "Paint by number" style pictures to colour in, the catch is, to colour in each part of the picture the child has to solve a sum. The early screens concentrate on simple counting, addition and subtraction. Later screens contain division, mutiplication and also a mixture of different sums. The user can select what type they prefer. The targeted age range for Colour Maths is approximately 4 to 10 year olds. Highly recommended.

1.54 056

Name : GIDDY 2
Author : P.Ruston
Disks : 1 Disk
Number : F1-056

Description :

At last, the sequel to the No.1 P.D hit Giddy is here and totally exclusive to the F1 range. For those of you who have never seen Giddy 1, I will explain. Everyone must of played, or at least seen a Dizzy game from Codemasters, giddy is a snipe at the Dizzy games and in most cases is better. Move around the scenery picking up objects and solving puzzles by manipulating objects. For example you must find a bucket of water to put out a fire. The graphics are great, with good use of colour. Giddy was coded in pure Assembly language meaning super smooth animations and slick gameplay. Every kid loves a dizzy game and soon every kid will want a Giddy game. Giddy is a craze just waiting to happen. A great platformer.

1.62 048

Name : ERIK
Author : David Parson
Disks : 1 Disk
Number : F1-048

Description :

RATED IN AMIGA FORMAT'S 1995 ANNUAL AS THE SECOND BEST PD GAME OF 1994

This excellent platform game was to be a commercial release but the company went bust before Erik saw the light of day. Since then the author has written more games and decided to give you Licenceware fans a treat and a bargain. The graphics and playability are excellent, loads of levels, secret rooms, bonuses, warps zones, weapons upgrading, shops, etc. etc. In fact everything you would expect from a commercial quality platform game.

AMIGA FORMAT said:
Nov 94 "Erik boasts great graphics and gameplay"

"Should be at the top of every PD buyers shopping list"

Amiga Power said: "A very professional game, and definetely worth a look"

1.63 047

Name : F1 MUSIC VOL 4
Author : Steve Gane
Disks : 1 Disk
Number : F1-047

Description :

The latest and best in the F1 Music series. This time we have 20 powerpacker mods of varying musical themes. If you are a programmer who can't write your own music then these disks are aimed mainly at you. Anyone who buys this disk from F1 or an official distributor can use Steve's music in their productions as long as you credit him somewhere in the program, there are no further costs to pay. All the music has been exclusively composed for F1 Licenceware and you won't see (hear?) it anywhere else. Steve is looking for work so if you are a programmer in need of a good musician drop him a line. His address is on the music disk.

REVIEWED IN CU.AMIGA JAN 95:

"NORMALLY THESE MUSIC DISKS ARE PRETTY USELESS BUT HERE IS ONE FANTASTIC
EXCEPTION" "THE MUSIC IS WONDERFUL" "WHO COULD ASK FOR MORE?"
RATED 90%

1.64 046

Name : MAZE MADNESS
Author : B.L.Gaunt
Disks : 1 Disk
Number : F1-046

Description :

Another maze/puzzler but quite different from T-Tec-Maze. In Maze Madness you control a car and must avoid the computer cars at all costs whilst clearing the screen of objects (like Pacman) but unlike Pacman you have a weapon in the form of "smoke screens" which you can use to temporarily block the paths of other cars. A really nice/addictive game, lot's of fun.

to this menu*

1.65 045

Name : T-TEC-MAZE
Author : Trevor Taylor
Disks : 1 Disk
Number : F1-045

Description :

This aim of this great maze game is, as you would expect, to get from the starting point to the exit of each maze. This involves moving your wobbly blob over switches that toggle gates of certain colours open and shut in various parts of the maze. This game is simple in concept, but like most

simple ideas is infuriatingly addictive and is extremely brain taxing. Not one for the kids!

CLICK Click to Run T-Tec-Maze

1.82 028

Name : CLI INDEX
Author : Mike Richmond
Number : F1-028
Disks : 1 Disk
Info : WORKBENCH 2 OR HIGHER ONLY

CLICK for Clindex Pro

Description :

Clindex Is a reference guide to AmigaDOS C commands. It includes a beginners tutorial. It does not in any way claim to be an experts' reference guide. The author suggests that if you are an absolute beginner you read chapter seven of the "Using The Amiga Workbench" manual to familiarize yourself with the basics as well as reading through and using the three supplied tutorials. Not only does Clindex include nearly all the commands in the Kickstart ROM and nearly all the commands in the Workbench C directory, it also covers some of the more common PD utilities you will find in the C directory of some disks. Plus, many commands are on the disk for you to try out in a small Shell window at the bottom of the screen!

You must have a Amiga using Workbench V2.0 or higher (ie. Not A500)

Amiga Format said: "Jam packed with text files detailing virtually all aspects of the shell environment" Sept 94

1.84 026

Name : TAKE A LOOK AT EUROPE
Author : GINA MEARS
Number : F1-026
Disks : 1 Disk

Description :

This educational package is aimed at eleven year olds and upwards. There are six learning modules all accessed from an easy to use, full screen menu. The modules are:

COUNTRIES

Type in the name of each country the jet plane lands on. A full European map is shown, and if you get stuck all you have to do is press help for the answer.

CAPITALS

You are presented with a map of a country and its name, you must match this to one of the 24 capitals given.

OCEANS

Name the ocean the whale is currently swimming in.

FLAGS

Enter the name of the country whose flag is shown.

CURRENCY

Scattered around the screen are 25 currencies, you are asked to link each currency with the correct country. A map is shown of each country.

QUICK REFERENCE

Gives information on each European country in the form of:
AREA, CAPITAL, CURRENCY, POPULATION AND LANGUAGE.

Full instructions are included in the program.

1.85 025a

Name : ART SCHOOL V1.1
Author : Alan Carter
Number : F1-025
Disks : 2 Disks

Description :

This is an update of V1 see F1-016 and now comes on two disks, hence the extra £1. I will let the author explain the why's and whatevers.

Since the release of version one Art School has had a few reviews. In the main, they were particularly favourable, however, a few 'bad apples' managed to invade the barrel. Many of the 'bugs' that were reported by reviewers were in fact due to concluding without researching i.e. the program seizure reported in Amiga Shopper was in fact the menu lock! As I have spent a not inconsiderable amount of time writing this program, I thought it was time for an upgrade, even though it hasn't been out that long. While re-writing some of the code I did actually find a few bugs (they are listed!) so nobodys perfect. Anyway, in true doc fashion, here are the revisions...

BUGS FIXED since 1.0

- * Error trapping on saves now fixed.
- * File buffer overflow now stops itself causing damage.
- * Confused narrator & keyboard now sorted.
- * Occasional effect changes failed : now fixed

... er, that's em all! I think...

NEW FEATURES

- * Help available from menu as well and keyboard.
- * Independent file buffer for Slide Shower.
- * Independent file buffer for Music Player.
- * Independent file buffer for Colouring Book.
- * File Path settings can now be altered for the above three functions.
- * Child Lock renamed 'Menu Lock' to avoid confusion!
- * Rainbow feature can now be reset to default.
- * Arrow Key Action Arrows are now animated to draw the users attention to the fact the current effect can be altered.
- * Fractal drawing feature now included and can draw either Mandelbrot or Julia sets to either a pre-defined window or full screen. Zooming and positioning controls are in.
- * Curve effect added.
- * Music player added with selectable playlist, tape transport style control panel.
- * Turtle graphics language now implemented with full text editor, saving and loading. Instruction set limited to 20 commands and simple branching, but if anyone wants it extended let me know.
- * Screen shrinking by 50%.
- * Magnadraw.
- * Comb & ColourComb effects.
- * Invert palette effect now 1000% faster!
- * Spare work screen now available!
- * Rub through effect from spare to current screen!

Alan Carter May 1994

1.86 025

Name : EXTRACTOR V3
Author : Steve Bye
Disks : 1
Number : F1-025

Description :

This program is for people who distribute archives but can't be bothered or don't want the hassle of making the disk friendly to de-archive. EXTRACTOR has been written with simplicity in mind for the compiler and end user. You can use EXTRACTOR as a friendly front end for disks of archived files that

you wish to store for backup purposes and/or to distribute.

EXTRACTOR V2 has been tested on a standard A600 and A1200 and works fine. Sorry A500/WB1.2< owners, EXTRACTOR will NOT work properly on your machine. EXTRACTOR can be run from Cli/Workbench or by booting the disk. On loading, EXTRACTOR will display all LHA/LZH/DMS/LZX archives found inside the ARCHIVES drawer, the user must first click on DESTINATION to choose where they would like the extracted files to be placed (DF0: DF1: Ram: or custom) The user then clicks on a file to select it and then on EXTRACT. The user can FORMAT or QUICK FORMAT a disk by first setting DESTINATION to the device to be formatted and then clicking on FORMAT or QUICK FORMAT. QUICK FORMAT is useful if you have a disk that has been previously used and you just want all the files on it erased. Takes about 15 seconds. The option NEW DISK is to either re-read the current disk or so the user can use another EXTRACTOR disk of archives without having to re-boot. The NEW DISK option means if you had a 10 disk set of archives only the first disk needs to load up EXTRACTOR. The user can then insert any of the other disks and click on NEW DISK to read and then de-archive it's contents. This saves disk space and makes it easier and quicker to use.

CLICK Click to Run Extractor

CLICK Click to Read Manual

CLICK Click to Un-DMS Disk

1.87 024

Name : MATHS MONKEY

Author : Gina Mears

Disks : 1 Disk

Number : F1-024

Description :

Gina Mears again, this one is for the older child, approximately 7 to 12 year olds. Offers fabulous value for money, the learning modules are:

TELL ME THE TIME: 32 clock/time questions of 4 different types.

ON THE BLACKBOARD: 24 questions covering addition, multiplication, subtraction and division.

GRID REFERENCE: 3 Different maps teaching the child to read coordinates, Excellently done.

MEASURE IT RIGHT: The child interacts with a ruler, measuring objects on screen.

MONEY MATTERS: How much is? type in the value of.. etc.

FUN WITH FRACTIONS:An excellent way of graphically teaching fractions.

1.88 023

Name : PICK AND STICK
Author : Gina Mears
Disks : 1 Disk
Number : F1-023

Description :

Yet another class production from the Gina Mears factory! This one is for children of up to six years old. Pick and Stick is a very simple, but fun, picture creator. The child can choose from three different settings, SEASIDE FAMILY or UNDERWATER. The child then has around fifty different objects to PICK and Stick on the background picture to create their own scenes.

Amiga Computing said "Children will benefit a great deal from this program July 94 as it will provide entertainment while encouraging their imaginations."

1.90 021

Name : MULTI-PLAYER YAHTZEE
Author : Dave King
Disks : 1 Disk
Number : F1-021

Description :

O.K this is the dice game Yahtzee, but the big difference here is that this version supports up to four players, and has some of the best sampled sound effects I have heard. In one player mode the computer opponent plays a mean game. Up to four players can play as human or computer or any combination of the two. We got a friend of ours who likes these type of games to play test it for us, his response was "Very realistic, absorbing, addictive as well as a lot of fun". Dave King, the programmer, said he spent nearly six months tweaking the game to perfection, and it shows.

CLICK Click to Run Multi-Player Yahtzee

CLICK Click to Un-DMS Disk

To return here from the program select "Quit" from the pull down menu at the top of the screen.

1.91 020

Name : IMPACT
Author : Steve Pullinger
Disks : 1 Disk
Number : F1-020

This is an original game, best described as a Demolition Derby Board Game, if you know what I mean? No? I will explain then. 1 to 3 players can play, each controlling a car on the board, dice are thrown to enable the distance you can move around the board (or track if you like) the total distance you can move Depends on the condition of your car. There are lots of power ups,

good and bad to be collected on the way round and the main idea is to smash up your opponents cars and get them into situations where they will crash into each other or obstacles. The sound FX and music are good and the gameplay is VERY addictive. One track can take anything from 10 minutes to two hours. As I said it's highly original and great fun, I have never seen anything like it, great stuff.

Name : RELICS OF DELDRONEYE
Author : Lee Bamber
Disks : 4 Disks

Number : F1-018
 Info : * 2 MEG CHIP ONLY *

Description :

 RATED IN AMIGA FORMAT'S 1995 ANNUAL AS THE BEST PD GAME OF 1994

If you have seen or played Monkey Island/Lure Of The Temptress etc. then you already have a good idea of what this game is like. It's a mouse driven interactive adventure with great graphics, sound fx and animations. Add to that brain numbing but logical puzzles, 64 colour graphics, around 100 locations and a dangerously high addiction level and you now have an even better idea. Relics is written by Lee Bamber, the author of the highly rated game FORTRESS (see above) and he admits that RELICS far exceeds anything else he has written before. P.D Demo version available. I have personally completed Relics, it took me every evening for two weeks and I can honestly tell you this game is BRILLIANT.....

1.96 015

Name : SPECTRA & ALL SQUARE

Author : Steve Rennocks

Disks : 1 Disk

Number : F1-015

Description :

This value for money disk contains two great puzzle games.

ALL SQUARE:

Essentially this is a very simple game to play , and requires both skill and speed. The aim of the game is to change the nine centre squares of your sixteen square playing grid to the same colour as the nine squares in the control grid. When the game starts the coloured squares in the control grid (bottom middle of the screen) are mixed up. You must then try and slide the 16 squares in your playing grid around so the nine centre squares match those in the control grid.

SPECTRA:

Is a highly addictive puzzle game that forces you to think ahead and predict what will happen should you make a certain move. The idea is to change the coloured circles on the left of the screen to match those on the right of the screen (it's as simple as that , or is it.

1.105 006

Name : BLACKBOARD V2.0
Author : D. Odd
Disks : 2 Disks
Number : F1-006

Description :

BlackBoard is an image proccessor written specifically for the AGA chip-set machines, although Blackboard will run on any Amiga with the following system requirements: 2 floppy drives (or a hard drive) and a minimum 1 meg of memory.

The program is formed by a number of disk-based modules which are run as required. This means that almost every aspect of the program can be upgraded and improved without having to re-write the whole thing. It also means that anyone can write their own add-on modules (e.g. Loaders, Displayers, filters etc.) Providing they stick to certain guidelines. Blackboard was

previously released as Public Domain with very few features and was reviewed and rated 88% by C.U.Amiga back in October 1993. Blackboard has now been enormously upgraded and debugged and is only available from F1 Licenceware.

Here is a list of SOME of Blackboard V2`s features:

```
=====
oMorphing                oWarping
oBulging                 oSqueeze
oPixelate                oQuantize
oFlip                   oInverse
oCrop                   oEdge enhance
oImboss edge            oReduce noise
oShade                  oMapping
oColour<-->Grey         oArc Palette
oScale                  oIntuitive menu system
oDisplay 2-256000 colours oOn disk documentation
oBuilt in mini art package oProgrammers guide to adding modules

1.111 Help Guide

```
=====
HELP SECTION
=====
```

This interface uses Commodore's AMIGAGUIDE document displayer. The reason for using this software is that it allows interaction of words, music and pictures, amongst other things.

* USE THE UP & DOWN ARROW KEYS TO SCROLL UP AND DOWN THIS TEXT SCREEN *

Along the top of the screen you will see a line of buttons as follows:

```
CONTENTS  INDEX      HELP      RETRACE  BROWSE <  BROWSE >
```

If you click on the CONTENTS button with the left mouse button you will be returned to the main menu screen, the place where this program started. CONTENTS will be ghosted if you are already in the CONTENTS screen.

The INDEX button is not used in this interface.

HELP, well, you are reading this so you know what that does!

Clicking on RETRACE will literally RETRACE your steps through this guide.

DO NOT click on the gadget in the top left hand corner of the contents screen as you will exit this program, if you do then you will have to re-load the interface.

BROWSE < ,Clicking on this will let you BROWSE through the pages of text in this whole document one by one. BROWSE < takes you backward.

If you want to PRINT any of these text files you can select PRINT from the pull down menu at the top of the screen. To do this first make sure your printer is on line and ready. Hold down the right mouse button and move the mouse pointer to the top left hand of the screen. Move the mouse pointer to the word PRINT and then release the mouse button. This disk is set up for a standard Epson printer, so should work on most machines.

Don't forget that most texts are longer than the visible screen, keep an eye on the blue meter bar on the right hand side of the screen, click on the up and down arrows to scroll through the text. Alternatively you can drag the bar up and down with your mouse or even easier use the arrow keys, it's up to you.

If you click on a button that displays a picture, just click the right mouse button to exit the picture and return back to the text when you have finished.

If you click on a button that plays music, make sure you press the escape

key before loading another song otherwise they will play on top of each other.

Now click on the RETRACE button at the top of this screen to return to the main menu. Good luck..

Steve Bye
Chris Wiles

1.113 About the F1 Licenceware CD-Rom

=====
ABOUT THE F1 LICENCEWARE CD-ROM
=====

Thank you for purchasing this CD. We have tried to make accessing the programs on this disk as simple as possible by using Commodore's AmigaGuide program, which allows easy movement through the pages, and simple one-click running of programs direct from the CD. Copy disks from the CD to floppy disk via buttons is very easy and re-creates the original disk exactly.

We have tried our best to get everything to run directly from the CD, but in some cases this has been impossible. We have contacted some authors to make changes to the software where possible. However some titles are simply not suitable to be run from CD.

This CD contains F1 Licenceware releases from 1 to 100. There is one omission (41, GP Manager 1994) that the author did not want on this CD, (probably due to it being almost two years out of date). However it has been replaced with a fantastic game called Codename Nano by Malcolm Lavery. This is the FULL version not the PD version and this version was previously sold for £5. F1 strategy fanatics are still well catered for with F1 Challenge (34) so no worries.

Just to make up for that small discrepancy there are some more exclusive non-PD programs on this CD, hope you like them.

If you want more information on our latest products, including our F1 Gold range of Licenceware that comes with a printed manual, then give us a call on 01392-493580 and as for a free catalogue disk.

=====
F1 COPYRIGHT
=====

Licenceware is NOT Public Domain. It is copyright to the author and you must not copy or give it to anyone else as this is illegal and will most likely lead to prosecution. If you copy and give away or sell Licenceware then you are infringing copyright; statutory English law. You are, in-effect, stealing from the author.

Every time you buy an F1 Licenceware product the author of that will receive a royalty, currently 25% of the retail price.

Licenceware is a lot cheaper than its commercial equivalent because it does not come in fancy boxes or with printed manuals.

All of our products are exclusive to F1 and our distributors, you cannot legally buy it anywhere else. F1 hold the Worldwide exclusive rights to distribute each and every product we sign up and only F1 and our officially appointed distributors are allowed to sell them.

Buy purchasing this CD you agreeing to the following:

YOU ARE NOT ALLOWED TO GIVE AWAY OR SELL COPIES
OF THE PRODUCTS ON THIS CD.

F1 Licenceware and Active Software will persistently pursue legal action against any company or individual, in any country that breaks the above agreement, without exception. Ignorance of this agreement is invalid.

All these products are available from F1 Software and other official F1 Licenceware distributors. CLICK for distributors list.

PLEASE ADD 50P TOWARDS POST & PACKAGING

Number : FG-001
Name : G.R.A.C V1.1
Author : Edmund Clay
Price : £6.99
Disks : 2 Disks
Manual : 28 page manual

Description :

* THE ONLY GRAPHICAL ADVENTURE CREATOR ON THE AMIGA *

This small update corrects a few minor bugs in the Grac V1 editor, not only that GRAC V1.1 will now work on ANY lmeg+ Amiga.

Comes complete with a printed A5 manual. To be honest if you already have

V1.0 you won't need this, unless you just want it for the manual. If that is the case, you can upgrade to V1.1 by sending your original disk 1 and £2.50 +50p P+P for V1.1 and the manual.

This extract is from the main listing:

Have you played the best non-commercial adventure on the Amiga? (Relics Of Deldroneye, F1-018) Yes? Enjoyed it didn't you! How would you like to create your own graphic adventure game similar or even better than Relics? Now, for the first time on the Amiga (and possibly any other computer) F1 brings you GRAC, The Graphical Adventure Creator. What! You can't program? Don't worry no programming skills are needed, though any programming knowledge will be of benefit. You will need a basic understanding of your Amiga though. GRAC supports standard IFF picture files/sound samples and MOD/MED music modules.

This program is a genuinely brilliant piece of software. Don't confuse GRAC with the old Adventure creators that have been about for years, at worst they allowed you to create text-only adventures and at best they allowed text and a still picture. Grac allows you to create Monkey Island/Relics style games with ease. I have personally seen GRAC's inception over the past seven months and Edmund has put a lot of thought and hard work into GRAC. If you can use Dpaint you can create a game. GRAC comes with a complete game called Lethal Formula written with GRAC to show you what can be done. Also included are plenty of example graphics/animations and a complete step by step tutorial. Grac is the first of its kind and you won't find anything close to it, even commercially.

Just to top it all, Edmund is willing to help any GRAC purchaser out with GRAC related problems if you send him an SAE.

If you are the creative type but can't get to grips with a programming language, GRAC is your saviour. The games you create with GRAC can be released as stand alone programs that you can sell yourself or release into the P.D. F1 would be very interested to evaluate any GRAC games for possible release so send them in. (See "Programmers" doc on this cat disk)

* If you would like a copy of Lethal Formula just send a blank disk and a stamp for a free copy * for all 1 meg+ Amiga's *

Number : FG-003
Name : MAGIC PAINT BOX
Author : Malcolm Lavery
Price : £6.99
Disks : 2 Disks
Manual : 22 page manual
Info : * NOT A500 *

Description :

This is our third and best childrens art package. Unlike Art School and Junior Artist you can output your pictures straight from Magic Paint Box to your printer. There are more than 84 functions to play with and its all made very easy to use with on-line VERBAL help, ie. click on a button and the program will tell you verbally what it is. MPB has all the features you would expect and then some. With the help of the printed manual, which clearly shows every icon and describes what it does, your child will be knocking out stunning pictures within minutes. Even if your kid is not artistic there are lots of ready drawn backgrounds to load in, and tons of colourful clip art stamps like flowers, planes, fences, clouds etc. MPB was written by Malcolm Lavery, a professional commercial artist, exclusively for F1 customers and we are proud to bring you this splendid product on the F1 Gold label.

THIS IS NOW OUR HIGHEST RATED PROGRAM EVER!!
RATED A ROCKING, ROLLING, STONKING 96% AMIGA SHOPPER NOV 95
