

There was not enough room on your computer to install the manual when the program was installed.

To view or print the manual:

1. Insert the program CD in your CD-ROM drive.
2. Use Windows Explorer or File Manager to open the Manual folder on the CD.
3. Double-click the .pdf file to start Acrobat Reader.

If there is more than one manual on the CD, you may need to open additional folders in the Manual folder.

4. Use Acrobat Reader to view or print the manual.

For information about using Acrobat Reader, see the Acrobat Reader online help, or view Adobe's Web site: www.adobe.com.
