

Warranty...

Your warranty card is our way of letting you know about new products and upgrades to your CD movies. As time goes on, quality gets better. We will reward our customer loyalty with VERY SPECIAL prices on future upgrades to your movies. So send in that warranty card today!

Your "House of Dreams" video CD-ROM for the Macintosh is warranted for one (1) year from the date of purchase to be free of any manufacturing defects. This, however, does not cover playback or compatibility problems with any inits and extensions in your System Folder. This product has been tested with all Macintosh computers from the Macintosh LC to the Macintosh Quadra 900 and is found to play on all 68020 and above Macintosh CPUs with 2 mb or more of RAM, 16 bit or higher video color depth and an Apple CD-ROM player. Other CD-ROM players with data transfer capabilities of 90k/second or more should play just fine, but Macintosh II and Macintosh LC family machines may have choppy playback with less than 16 bit color depth. Please read the Warnings/Performance chapter in this document for more information about performance.

If you should experience what would seem to be problems with the disc itself, and are sure that it is not a problem with your CD-ROM player or drivers, return it to the store of purchase. If your disc needs replaced and your retailer cannot help, send your CD-ROM disc, a full description of your problem, and a photocopy of your receipt to:

Romulus Entertainment
1448 19th Street
Santa Monica, CA 90404
(310) 453-5068

For products out of the warranty period or without a receipt, please include your CD-ROM disc and a check or money order for \$20.00 to cover the new disc, shipping and handling.
