

About [Entire Movie...](#)

Entire Movie is a QuickTime “pointer” file for lack of a better title. This file holds pointers to all of the video frames in all 5 of the chapters of House of Dreams. To play the entire movie in one clip you must have 2.5mb of available RAM, which usually means a 4mb machine or greater. If this is true, then follow these instructions:

Copy “Digital Ecstasy Player” to your hard disk

Click on the “Digital Ecstasy Player” on your hard disk and select Get Info from the file menu

Change the “Current size” to 2500 and close the Info window

Now you can copy the “Entire Movie” file to your hard disk if you wish

Open the “Digital Ecstasy Player” on your hard disk

Select Open from the File menu and open the “Entire Movie” file

Now the movie will play back as one complete viewing
