tccQuotation™ ActiveX DLL
## For Windows 95/98 and NT4

URL: http://www.TheContrastCompany.co.uk
Email: development@TheContrastCompany.co.uk

This ActiveX DLL has been developed using Microsoft Visual Basic 6 and requires SP3 to be installed.

This is the first version and I would welcome any feedback or criticisms.   Please direct all correspondence to RobertBrown@TheContrastCompany.co.uk.

The DLL contains about 350 quotations. A new version that I am currently testing will contain over 10,000 quotations available in different categories.   I am also developing a help file to complement the ActiveX DLL.

The source code is available on request.
