-  Run Help on CyberPanel
-  Select a screen saver
-  Test a screen saver
-  Setup a screen saver
-  Install a screen saver
-  Archive current saver
-  Delete the selected saver
-  Change directory of Archive

Shareware or Freeware?

WHAT IS SHAREWARE:

Shareware is not a particular type of software, rather a marketing channel for developers of software. Shareware is **copyrighted** software distributed at a minimal cost enabling the end user to "try before you buy" based on a "user honor system." Basically, you save money by not buying software that doesn't meet your requirements. After evaluating this software, if you find any shareware programs useful, then you are **required** to pay and register the game directly with the developer according to their terms.

WHAT IS PUBLIC DOMAIN/FREWARE:

Public domain is software to which the author has given up all intellectual property rights and his/her right to control the use of the product. You do not have to pay a registration fee to use this software.

Install a Screen Saver

To install a screen saver into the windows directory:

- Push the  button
- Press (Alt I)

Select a Screen Saver

To select a screen saver to be your current screen saver:

- Push the  button
- Press (Alt L)

Test a Screen Saver

To test a screen saver:

- Push the  button
- Press (Alt T)

Setup a Screen Saver

To setup a screen saver:

- Push the  button
- Press (Alt O)

Display Information:

To display information about a screen saver:

- 1) Choose a screen saver contained on the CYBERdelic CD-ROM.
- 2) Click the  box.

The screen will then enlarge revealing the additional information. The author's name, cost, description and type of module are provided.

NOTE: This feature is only available when viewing screen savers off of the CYBERdelic CD-ROM.

View Installed Screen Savers:

To view all screen savers currently installed on your machine in the windows directory, click on the **CURRENT** tab.

View Other Screen Savers:

To view a list of screen savers contained in another directory or drive, click on the **ARCHIVE** tab.

NOTE: CYBERdelic will also read other CD-ROMs!

View Screen Savers on CYBERdelic :

To view a list of screen savers contained on the CYBERdelic CD-ROM, click on the **CD-ROM** tab.
