Tallis Saver - 3D Texture Map

Installation
To run '3D Texture Map' copy all of the files in this .zip file into your windows directory and then start up Control Panel. In the 'Screen Saver' drop-down list there should be a '3D Texture Map (v3)' entry.
To use the designer feature you will need the file 'VBRUN300.DLL' installed in your windows/system directory. If you don't have this don't worry - the saver will still run, you just won't be able to amend the patterns.

New features
• A major new screen effect 'Screen Splits'
• More colours in textures
• A new designer feature that will allow you to edit and rename textures
• On-line help

How much does it cost to register?
Nothing. '3D Texture Map' is free but I reserve the copyright. Before '3D Texture Map' is included in any publication (electronic or otherwise) I would appreciate it if you got in touch with me.

Viruses et al
I have checked all of the code and files for viruses. However I can give no guarantee that no naughty person will ever infect them after release, so (as with all software) it is best to check them before installation.

Bugs
Or 'undocumented features not available in the next release' (:-)). I don't think there are any, but if you do find some please let me know and I'll try to have a fix released as soon as possible.

Comments/grumbles/ideas
You can get in touch with me at:
