

## **California Poppy**

*(Eschscholzia)*

Single- and double-flowered, cup-shaped, long-stemmed flowers with lacy foliage on 1- to 2-foot stems.

### **Soil and Light**

Full sun or partial shade. Light, well-drained soil.

### **Planting**

Scatter seed outdoors as soon as ground can be worked. Often self-sows.

### **Comments**

Try planting in areas where other annuals won't do well, or in tubs and pots. Likes cool weather.
