

## **Oxalis**

Also called wood sorrel

(*Oxalis* sp.)

**Soil:** Average

**Light:** Full sun to light shade

**Planting Depth:** 3 inches

**Planting Distance:** 6 inches

With clover-like leaves, blooms are small and yellow, white, pink, or purple, depending on time of year. These lovely rascals are so vigorous they can invade other plants if not contained or grown in baskets. Or plant them in large open areas.

## **Comments**

Oxalis is a large and varied family. Members grow best--almost year-round--in the South and are often found as a greenhouse plant in the North. Plant in the fall.
