

## **Persian Violet**

Also called German violet

*(Exacum affine)*

Persian violet produces pale blue, fragrant flowers in fall and winter. Start a new plant each year.

### **Light**

Expose to medium (bright indirect) light. Plant does not bloom well in low light.

### **Water**

Allow soil surface to dry between thorough waterings. Mist daily. Raise humidity.

### **Temperature**

Maintain temperatures of 60 to 70 degrees.

### **Comments**

Feed every 14 days with mild solution during active growth. Remove spent blossoms. Propagate by seed, maintaining a soil temperature of 68 degrees or higher.
