

## **Piggyback Plant**

Also called pickaback plant, thousand-mothers, or youth-on-age  
(*Tolmiea menziesii*)

Piggyback plant boasts pale green, fuzzy leaves that often support little plantlets piggyback-style. It looks best in hanging baskets.

### **Light**

Expose to medium (bright indirect) light. Avoid full sun. Tolerates low light. Grows well if under artificial light 14 hours per day.

### **Water**

Keep evenly moist at all times. Letting soil dry out will brown leaves and may kill plant. Mist daily. Raise humidity.

### **Temperature**

Maintain cool temperatures, especially in winter (mid-50s), for best growth. Tolerates average temperatures.

### **Comments**

Feed every week with mild solution. Rinse foliage occasionally. Let drip-dry in low light. Propagate by division or by potting plantlets.
