

Persian-Shield

(Strobilanthes dyeranus)

Persian-shield is grown as a foliage plant, although it can produce violet flowers on occasion.

Light

Expose to medium (bright indirect) light. Avoid full sun. Tolerates low light.

Water

Allow soil surface to dry out between thorough waterings. Do not let roots dry out.

Temperature

Maintain temperatures of 55 to 70 degrees.

Comments

Feed lightly. Take tip cuttings.
