

## **Beautybush**

*(Kolkwitzia amabilis)*

Half-inch pink or pink and white flowers, followed by unusual brown seedpods that cling until winter. Foliage turns red in the fall. Bark peels attractively.

**Zone:** 6

**Light and Soil:** Full sun or partial shade. Moist, well-drained soil.

**Height:** 15'

### **Comments**

Use as specimen plants; they look best when grown singly. Needs no pruning or special care. Branches are upright and arching.
