

## **Heather**

*(Calluna vulgaris)*

Small, single or double flowers appear in midsummer in 1- to 4-inch clusters. Many varieties. Flower colors include rose, purple, pink, white, and coral. Foliage is green or yellow, changing to bronze in the fall.

**Zone:** 5

**Light and Soil:** Full sun. Tolerant of most soil types; prefers slightly acid soil.

**Height:** 3'

### **Comments**

Use in beds, foundation plantings, rock gardens, or as a ground cover. Mulch for best results. Prune in early spring before new growth begins.
