

# Tree Peony

*(Paeonia suffruticosa)*

Six- to 12-inch single, semidouble, or double flowers appear in late spring. Many colors and varieties. Foliage is gray-green.

**Zone:** 5

**Light and Soil:** Partial shade; can tolerate full sun. Rich, moist, well-drained soil.

**Height:** 7'

## Comments

Very showy with flashy flowers. Use as specimen plants or in beds. Protect in winter in cold winter areas. Hardier than they look. Occasionally need staking.
