Requirements:

- 1). Windows Version 3.1 or higher
- 2). The file VBRUN300.DLL, installed in your Windows\System directory (all Visual Basic programs require this, you may already have it and if you don't you will probably want / need it sooner or later).

Installation:

- 1). Make a new directory named "WONTOP" and copy WINONTOP.EXE & WOTREG.EXE (and optionally WOTHELP.WRI to it) You may copy these files to your Windows directory if you wish.
- 2). Copy threed.vbx to the Windows\System directory. If there already is one there check the file dates and use which ever one is the most recent.
- 3). Create a new program item (see your Windows documentation) for Always On Top.
- 4). If you want to start it each time you use Windows include it in the Startup group or the Run= line in the Win.ini file. Eg... "Run=C:\Wontop\WINONTOP.EXE". Just add this line manually behind whatever is already there leaving a space between the last one or use the

Program Manager to have it start it for you (again see your Windows documentation for details).

The files that are included in the package are as follows :

WINONTOP.EXE....Win OnTop executable file
WOTREG.EXE.....Registration file DO NOT DELETE
THREED.VBX.....Must Be In Your Windows\System Directory
WOTHELP.WRI.....This file.
