Introduction

The object of Bomb Squad is to defuse a time bomb by correctly guessing its secret code before it explodes.

Required Hardware and Software

'286, '386, '486, or Pentium computer running Windows 3.1.

Installing the Program

In the MS-DOS shell, or with the Windows File Manager, create a subdirectory for the program. For example:

`MKDIR C:\BOMB_SQ`

Then copy all files from the distribution disk into the subdirectory. For example:

`COPY A:\*.* C:\BOMB_SQ`

The program is made up of the following files: `BOMB_SQ.EXE`, `BOMB_SQ.HLP`, and `*.WAV`.

Using the Windows Program Manager, select the File menu and the New submenu. Then press the Program Group button and the OK button. Enter `Bomb Squad` in the Description field and press the OK button.

Select the File menu and the New submenu again. This time, press the Program Item button and the OK button. Enter `Bomb Squad` in the Description field, and enter the location of the program in the Command Line field, for example:

`C:\BOMB_SQ\BOMB_SQ.EXE`

Press the OK button.

Bomb Squad is now installed.

Running Bomb Squad

After starting Bomb Squad, select the Help button with the mouse for further instructions.

Distribution and Payment

Bomb Squad may be freely copied without cost, provided it is not changed in any way. If you find the program useful, please send $7.50 to:
