[Other Products.](#)

## About TATU Software.

TATU Software (Namely David Willson) is a single person concern, I have been writing software in Visual Basic for some time now and after a friend at work was discussing the National Lottery and the 'Human' logic of selecting the numbers each week I decided to write myself a program to randomly select 6 numbers to assist in filling out my lottery ticket.

LOTTO started out life as a single window application and grew. I have not yet had any luck using this program but surely this method of choosing Six numbers stands as much chance as any other.

# How to use LOTTO.

Parts of the lotto Window....

Please Click on a part of the Window....

Generate Button.

Click on this Button to start the random number generator.

About Button.

Click on the About button to view The About Screen.

Click on the Exit Button to Close LOTTO and return to Windows.

Numbers.

This is the set of Six random Numbers.

Whirler.

This 'Whirler' Shows that the program is calculating your Numbers for you.

Window Title.

The Title of the active Window.

# About the Shareware principle

Shareware, sometimes called "user supported" software, is a distribution method, not a type of software. It is "try before you buy" software. The essence of user supported software is to provide computer users with quality software without high prices, and yet provide incentive for programmers to continue to develop new products.

Copyright laws apply to shareware and commercial software alike. Shareware authors, however, grant you limited rights to copy and distribute the software. These rights vary with different authors and programs, but allow you a chance to try the software before buying it.

The shareware concept depends on the support of its users. After a specified trial period, if you decide to keep using a shareware program, you are expected to send in the requested payment to register with the author. These funds reward the authors for their valuable work, and fuels their future endeavors - support, new programs, new and better features. With shareware, you get the ultimate money-back guarantee - if you don't use the product, you don't pay for it.

TATU Software has made this edition of LOTTO available as shareware. The shareware edition is fully functional.

# How to receive a registered version of LOTTO

LOTTO Version 1:00 for Windows is Shareware. To register your Use and receive a registered copy please send a donation (donation varies depending on wealth!, If this program helps you to win the Lottery then a bigger donation would be appreciated!) to:

TATU Software.  
32 Oakwood Road,  
Eastleaze,  
Swindon,  
Wiltshire.  
SN5 7EF.

Thank you.
