Microsoft® PhotoDraw™ 2000 Version 2

The Microsoft Office Graphics Program

Add Impact to All Your Business Communications
Create the professional look you want for your Web site, printed documents, and presentations using Microsoft Photodraw 2000 Version 2 business graphics software. PhotoDraw combines easy-to-use image-editing and drawing tools in a single powerful program that enables Microsoft Office business users to enhance their communications using photos, shapes, text, and special effects, and get professional-looking results every time.

Create Graphics for All Your Needs

PhotoDraw 2000 makes it easy to optimize and save graphics in appropriate formats for the Web, print, and presentations so you can create a unified look for all your communications. For example, use your company's logo in your Microsoft FrontPage® Web site, on the cover of a printed catalog created in Microsoft Publisher, in a fact sheet created in Word, and in a Microsoft PowerPoint® presentation.

All the Tools You Need in One Application

With Microsoft PhotoDraw 2000 you can streamline graphics creation by working on photos, clip art, drawings, shapes, and text with the same tools and at the same time. And you can combine photos, text, and other effects such as 3-D into a single, highly effective graphic.

Enhance Your Own Images or Work with Ours

Import your own photos or select from our library of 20,000 images and pieces of clip art. Customize standard clip art by adding a photo, or using easy-to-apply artistic brushes and colors.

Powerful photo-editing and touch-up tools include one-click automatic color correction and dust-and-scratch removal to help you make any photo fit for publication.

Express Your Graphic Ideas by Drawing Them

Create the perfect image using advanced drawing tools. A single mouse-click applies just the right effects, such as the artistic brush shown below. Choose from 200 built-in special effects and styles—including new embed, emboss, highlight, and glow—in multiple resolutions so your creation looks great online and in print.
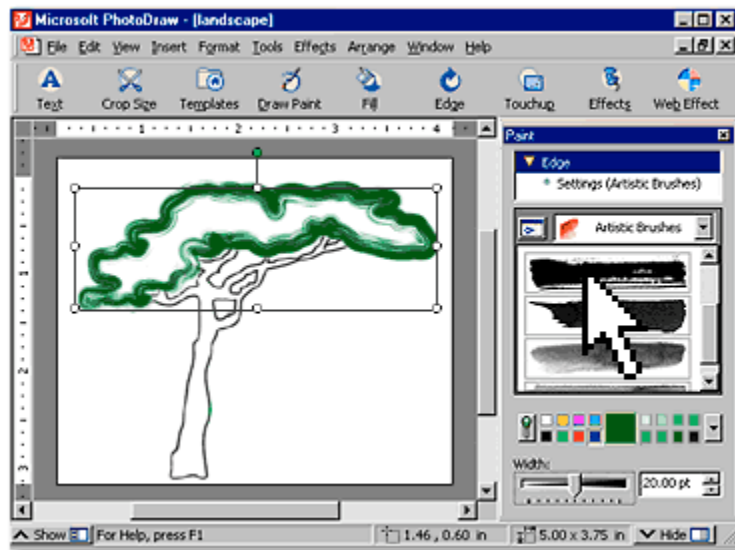

Start Fast and Stay on Track

Microsoft PhotoDraw 2000 is designed to get you up and running quickly, and then help you stay productive. Step-by-step wizards and easy-to-apply point-and-click effects save you time by simplifying common graphics tasks. And flexible templates help you create a wide range of projects, from Web buttons to flyers.

Rely on Built-in Design Expertise Right from the Start

Jump-start your projects and speed your work with more than 450 professionally designed templates and content. Get step-by-step assistance while you create your design.
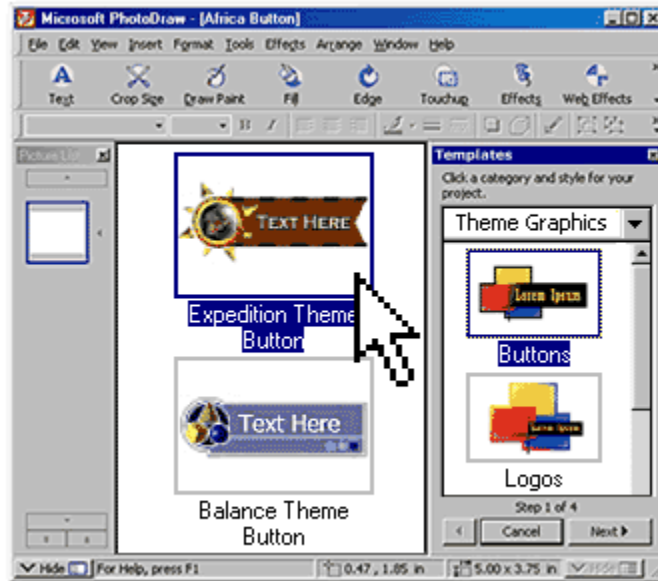

Save Your Graphics Without the Guesswork

Automatically save your graphics in the optimal format for the Web, print, or presentations with the Save for Use In Wizard. Preview graphic size, download time, and image quality for professional results. You can also automatically save or convert all your open graphics to a different format in one quick batch process.
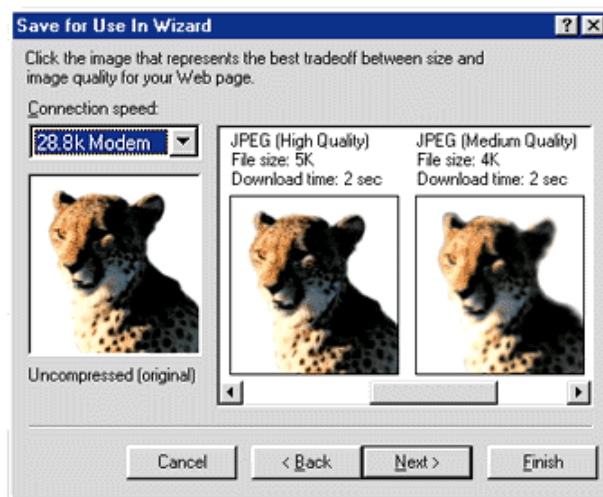

Quickly Apply Formatting
Create a custom look and then easily apply it to any object using the Format Painter tool. Just select the object whose formatting you want to copy, click on the Format Painter icon, and then click on a different object. It's that simple.
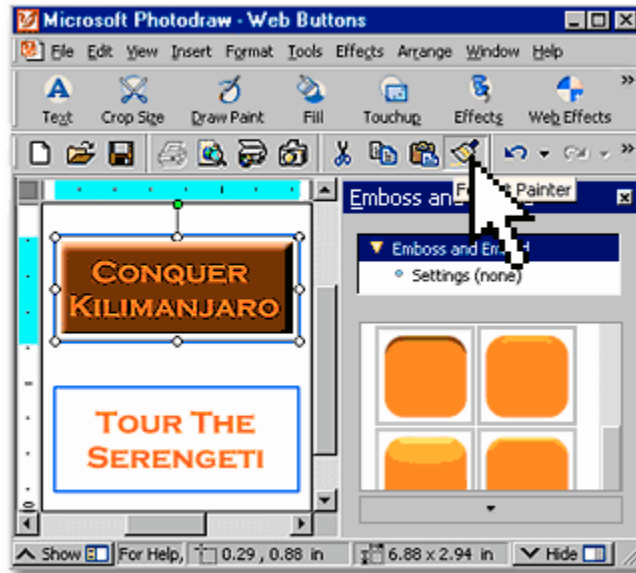

Create Eye-Catching Web Graphics

Work with an array of tools to help you create banners, GIF animations, image maps, and rollover buttons for attractive and dynamic Web graphics. Jump-start your Web graphics projects by choosing from a variety of new Web graphic templates or create your own. Take advantage of HTML by opening and editing Web graphics from within your Web browser. And, use automatic image slicing to decrease graphic size and create space on Web pages. Preview your work in a Web browser to see how your creation will appear on your site.

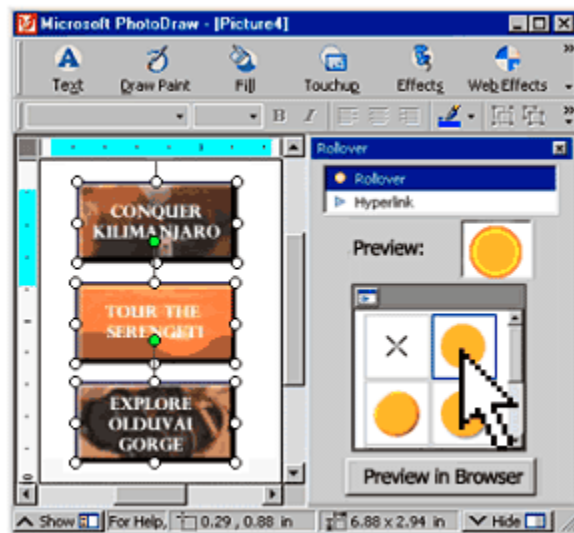

Get Attention Quickly with One-Click Animation
Bring your Web pages to life with easy-to-apply GIF animations.
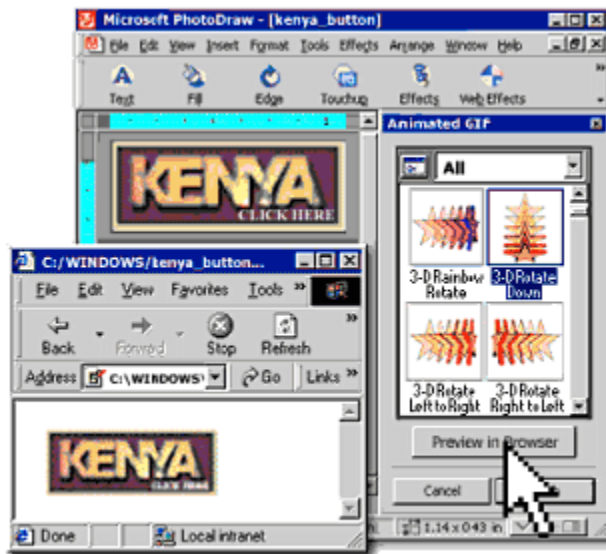

Easily Add Web Button Rollover Effects
Create dynamic Web graphics such as rollover effects that include highlighting and color changes. Easily export them for use in Microsoft FrontPage® 2000, and use Web-safe color palettes.

Share Your Graphics with Other Microsoft Office Applications

Add impact to your documents and presentations and give all your projects a consistent look. Customize your Web pages, documents, and presentations by mixing PhotoDraw graphics with themes and color schemes from Microsoft FrontPage®, Word, the PowerPoint® presentation graphics program, and Publisher.

Enhance Communications Created Using Office

Use graphics created in PhotoDraw to enhance flyers, newsletters, catalogs, documents, and Web pages created Office applications.

Create graphics in Microsoft PhotoDraw

Easily export graphics for use in Microsoft FrontPage

Enhance Microsoft PowerPoint presentations

Use these graphics to add impact to flyers and catalogs in Microsoft Publisher
