

Introducing the DeskBar Application

DeskBar provides you with a very powerful system of application toolbars. These toolbars are populated with your choice of buttons that provide quick and easy access to almost anything on your desktop. You can have buttons that access your favorite Control Panel applets, Dial-up Networking programs, Web pages, printers, applications, documents, or directories. You can also control your screen saver and wallpaper, and get one-click access to the Windows Run dialog, Find menu, and a variety of shutdown options. You can have one or multiple bars and dock them along an edge or float them in any orientation you wish. **DeskBar** can provide you with a button to almost anything!

REGISTRATION BENEFIT!

DeskBar is shareware, and comes complete with all available buttons and capabilities for your evaluation. However, until **DeskBar** is registered, you are limited to a maximum of 2 open bars, each with a maximum of 6 buttons. All other application features are fully functional.

What's New!

Here is a brief description of some of the new features in **DeskBar**.

Drag-and-Drop Button Rearranging

You can now drag and drop buttons in DeskBar to rearrange them. See [Navigating Buttons](#) for more information.

Explorer Context Menu

You can right-click on a file or folder in Explorer and choose "Add to DeskBar" from the context menu to quickly add a shortcut button to one of your bars.

OpenBar Button

This new button lets you open bars from a popup menu or a single button click. See [OpenBar Description](#) for more information.

Easier Bar Creation

You can now create bars very easily by clicking the "Create new bar" entry on the main DeskBar menu. See [The Main Menu](#) for more information.

Automatically launch Shortcut buttons

You can now specify a Shortcut button to automatically launch when a bar is loaded. See [Shortcut Properties](#) for more information.

Introducing the Main Menu

The main **DeskBar** menu is accessible from the system tray or from a hotkey and provides access to application properties and bar management.

Introducing the Bar

A bar is a “toolbar” window that you can populate with a variety of buttons to get just the configuration you need. You can position a bar along any edge of the screen or float it anywhere you want. You can resize it to create a button ‘palette’ of any desired shape. Bars also have Auto-hide and Always-on-top capabilities.

Contacting Burrell Software Enterprises

Mail Address:

Burrell Software Enterprises
4718 Millhaven Drive SE
Kentwood, MI 49548

E-Mail Address:

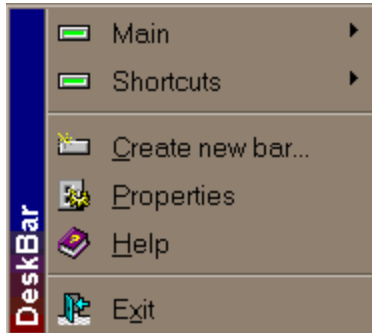

burrell@iserv.net

World Wide Web URL:

<http://www.iserv.net/~burrell/>

The Main Menu

Here is a sample representation of the **DeskBar** Main Menu:

This menu is displayed when you click on the **DeskBar** icon  in the tray area of the Windows Taskbar. You can also call this menu up with a hotkey. (see [Options Page](#))

The menu entries are as follows:

Main and Shortcuts

This area of the menu contains the names of the available bars. Each bar entry contains a popup menu that allows you to activate or open the bar, show or hide it, display its properties, close it, or delete it.

Create new bar

Displays the [Create New Bar Dialog](#).

Properties

Displays the [DeskBar Application Properties](#).

Help

Displays help for the application.

Exit

Closes all open bars and exits the application.

Options Page

This page provides general application options for startup, confirmation, and the keyboard.

Show splash screen

Check this box to display the **DeskBar** splash screen every time the application starts. The splash screen provides a quick display of version and registered user information.

Show tips

Check this box to display the Tips page every time the application starts.

Deleting buttons

Check this box to display a confirmation dialog whenever you delete a button.

Deleting bars

Check this box to display a confirmation dialog whenever you delete a bar. Since bars cannot be recovered once they are deleted, this confirmation provides an extra measure of safety.

Main Menu Hotkey

This field contains the hotkey you want to type to invoke the Main Menu.

NOTE: Sometimes the Windows Taskbar will reload itself in the event of an error in the system. When this happens, icons in the tray DO NOT get reloaded! If you have a hotkey setup for the Main Menu, you will still be able to access and configure **DeskBar**.

Set Data Folder

Click this button to display the [DeskBar Data Folder Dialog](#).

Related Topics

[Tips Page](#)

[Common Button Context Menu Items](#)

Tips Page

This page provides a simple viewer for quick tips that may help you be more productive with **DeskBar**.

Next Tip

Click this button to display the next tip. **DeskBar** tips are stored in the file DBTIPS.TXT. This is a standard text file that you can edit with Notepad. If you have a favorite tip for **DeskBar** that others may find useful, let me know and I'll include it in the next release with a credit in your name!

About Page

This page provides information about the application version, contacting Burrell Software Enterprises, and the registration status.

Visit DeskBar on the World Wide Web

Click this button to view the Burrell Software Enterprises home page with your Web browser.

Send e-mail to Burrell Software Enterprises

Click this button to start your e-mail program with the address of Burrell Software Enterprises.

Bar Page

This page provides options governing the behavior and appearance of the bar.

Left

Click this button to dock the bar along the left edge of the screen.

Top

Click this button to dock the bar along the top edge of the screen.

Right

Click this button to dock the bar along the right edge of the screen.

Bottom

Click this button to dock the bar along the bottom edge of the screen.

Float

Click this button to float the bar anywhere in the center of the screen.

Auto hide

Check this box to make the bar hide when it is not active. As you move the mouse over the thin strip of the bar that is still visible, it will fully appear. This option is unavailable when the bar is floating.

Always on top

Check this box to force the bar to stay on top of all other windows on your desktop.

Hidden

Check this box to hide the bar. A hidden bar is still open and loaded but does not appear on the screen. Showing and hiding bars is faster than opening and closing them.

Hotkey

This field contains the hotkey you want to type to activate the bar.

Name

This field contains the name of the bar.

Preview

This area displays a miniature preview of the bar with the current position, auto-hide, and always-on-top settings.

Related Topics

[Positioning and Resizing Bars](#)

Buttons Page

This page provides the primary means of managing the buttons on a bar. Here you can add and remove buttons and separators, set button properties, and set the button style.

Button List

This list contains the current buttons on the bar.

Add

Click this button to display the dialog you use to add a new button. The new button will be inserted into the list just below the current selection.

Separator

Click this button to add a separator after the current selection. A separator is used to provide 'whitespace' around your buttons. The size of the separator can be adjusted by editing its properties. It is important to remember that separator units are one quarter the size of a button. This means that a separator of 4 by 4 will take up the same space as a button.

Remove

Click this button to remove the current selection.

Properties

Click this button to display the properties dialog for the currently selected button or separator.

Up and Down Arrows

Click these buttons to move the current selection up or down in the list.

Button Style Buttons

Click one of these buttons to select the size and style of the buttons. Currently, all buttons are the same size and style.

Show ToolTips

Check this box to display tool tips for the buttons.

REGISTRATION BENEFIT!

In the unregistered version of **DeskBar**, the **Add** and **Separator** buttons are disabled when you have 6 buttons on a bar. If you remove one, they will become enabled again. When you register **DeskBar**, there is no limit to the number of buttons.

Related Topics

[Navigating Buttons](#)

[Common Button Options](#)

Positioning and Resizing Bars

Bars can be moved and resized with the mouse by clicking on the bar background and dragging it to a new position. As you move the bar close to an edge, it will dock or attach to that edge. You can override this docking behavior by holding down the ALT key as you drag the bar.

It is possible to resize your bar so that there is no background area to click on. For this reason, it is always a good idea to have at least one separator on a bar.

Related Topics

[Bar Page](#)

Navigating Buttons

Buttons on a bar are activated by clicking the mouse button on them. If the bar has focus, you can navigate the buttons with the TAB or ARROW keys. Pressing the SPACE bar will activate the button with the focus. Pressing the DELETE key will remove the button with the focus.

To change the order of the buttons, you can move them up or down in the list on the [Buttons Page](#). Or you can drag and drop buttons on a bar or between bars. To drag and drop buttons, hold down the ALT key, click a button, and drag it where you want it.

Dragging a button on the same bar will result in a MOVE operation by default. You can override this and force a COPY operation by also holding down the CTRL key.

Dragging a button to a different bar will result in a COPY operation by default. You can override this and force a MOVE operation by also holding down the SHIFT key.

These keystrokes are the same ones that Explorer uses when dragging and dropping files on the same drive and across drives. If you are familiar with Explorer's drag and drop behavior, learning **DeskBar's** should be easy.

Common Button Options

Note: All buttons provide direct access to their properties through a context menu. This menu is displayed when you right-click on a button.

Tool Tip

Fill in this field with the text you want to display as a tool tip for the button. In most cases, a default tool tip will be used if you do not provide one.

Change Icon

Click on this button to display a dialog box that will let you browse for the icon you want to display on the button. A default icon will be used if you do not provide one.

Shortcut Description

The Shortcut button is probably the most powerful one in **DeskBar**. With it, you can create buttons to access any application, document, or directory in your system. What's more, you can drag and drop any item in your Control Panel, Printers folder, Dial-up Networking folder - any folder in Explorer! - to a bar for one-click access to it. And finally, for all you World Wide Web fans out there, you can create a Shortcut to any Web page by specifying the full URL as the target for the Shortcut. An even easier method is to drag a link from your Web browser and drop it on a bar.

Click on the button to launch the target. If it is a Web address, your dialer will automatically be launched along with your browser.

Spend time playing with Shortcut buttons and discover the many powerful things you can do with them!

Related Topics

[Shortcut Properties](#)

[Common Button Context Menu Items](#)

Shortcut Properties

Target

This text field contains the path to the application, document, Web page, Control Panel applet, etc. If the shortcut points to a non-file target, all options on this page are disabled. Basically the only way to create a shortcut to a non-file object is by dropping it on a bar. If enabled, the browse button ('...') will allow you to select the target through a dialog box. The browsing capabilities for non-file objects will be improved in a later version.

Arguments

This text field contains any arguments you want to pass to the application in the target field.

Start in

This text field contains the initial directory to use when launching the application in the target field. If this field is left blank, the application directory is used. If enabled, the browse button ('...') will allow you to select the directory through a dialog box.

Run

Use this to select the way you want the new window to be displayed: normal, minimized, or maximized.

Allow dropped files

Check this option to allow files to be dropped on the button. For example, if the shortcut's target was Notepad, you could edit files with Notepad by dropping them on the button.

Prompt for arguments

Check this option to be prompted for arguments with a dialog box when you click on a Shortcut button. Any arguments you enter in the 'Arguments' field will appear in this dialog box, and may be edited.

Launch automatically

Check this option to automatically launch the target every time the bar with this button is loaded.

Create New Bar Dialog

The dialog is used to enter the name for a new bar.

Name

This field contains the name of the new bar. If you enter the name of an existing bar, you will be notified and prompted to enter a different name.

DeskBar Data Folder Dialog

DeskBar allows you to set the data folder on a per-user basis. If multiple people use one computer, they can each specify a different data folder to maintain a unique DeskBar configuration. Unless multiple people use one computer, this setting will not generally need to be changed.

Data Folder

This field contains the path to the data folder. This folder contains the layout and bar files used by DeskBar.

Default

Click this button to set the data folder to the directory where DeskBar is installed.

Register Dialog

The dialog is used to enter **DeskBar** registration information obtained from Burrell Software Enterprises. These fields must be entered EXACTLY as received or the registration process will fail. Some users have encountered problems when using the numeric keypad to enter their registration information. Perhaps the best way to enter your information is to copy and paste it from the e-mail message you receive when you register.

Name

This field contains the registered user name.

Company

This field contains the company information, if applicable.

Registration Code

This field contains the unique registration code for the registered user.

Related Topics

[Register Page](#)

Select Bar Dialog

This dialog is displayed whenever you right-click on a file or folder in Explorer, select “Add to DeskBar” from the context menu, and have multiple bars to choose from. A bar must be open and visible in order to have a file or folder item added to it. If only one bar meets this criteria, then this dialog will not be shown.

Available bars

This list contains the bars you may add a file or folder button to. You may select one and click “OK” or double-click the desired bar.

Separator Properties

The dialog is used to set the size of the separator. The separator units are one quarter the size of a button. For example, a separator with a width of 4 and a height of 4 will be exactly the same size as a button.

Some experimentation will make the usage of these units clearer.

Width

This field contains the number of units in the horizontal direction.

Height

This field contains the number of units in the vertical direction.

Known Problems and Limitations

If you drop a document on a shortcut to a printer, it does not print the document. This will be fixed in a later version.

Some people have reported problems with power management features while **DeskBar** is running. The most common symptom is that the screen saver no longer kicks in. I am investigating this problem and will provide a fix as soon as possible. A few users have reported that the “Auto-hide” setting affects this behavior, so changing this may help.

Future Plans

Make the target's context menu available on a Shortcut button's context menu.

Add text-only and text-with-icon to the choices of button styles.

Add a clock/stopwatch button.

Support for the 'Common' folders in Windows NT.

'Clear' options for the Documents Folder, Find and Run context menus.

Add a hotkey option to each button.

How to Order

Registration Benefits:

DeskBar is built from the most advanced software technologies currently available, and will continue to improve as the technology moves forward. Your registration fee will help enable **DeskBar** to remain at the forefront of technology and make you more productive.

As a registered user, you will receive:

- A registration code that enables you to have unlimited bars open, each containing unlimited buttons.

- Your name and organization on the splash screen and About page.

- Free maintenance* releases.

- Free technical support via e-mail.

- An eager ear for your comments and suggestions for improvement.

* Burrell Software Enterprises reserves the right to charge an upgrade fee for major new releases.

Ordering by check:

To order by check, complete and send the completed order form ORDER.TXT and a check to Burrell Software Enterprises, 4718 Millhaven Dr. SE, Kentwood, MI 49548. Payment must be in US dollars drawn on a US bank, or you can send cashier's checks or international postal money orders in US dollars.

Ordering by CompuServe:

To have the registration fee added to your CompuServe bill, use the CompuServe command GO SWREG and follow the menus. **DeskBar's** CompuServe registration ID is 2220.

Ordering by credit card:

You can order with MC, Visa, Amex, or Discover from Public (software) Library by calling 800-2424-PsL or 713-524-6394 or by FAX to 713-524-6398 or by e-mail to 71355.470@compuserve.com. You can also mail credit card orders to PsL at P.O.Box 35705, Houston, TX 77235-5705. **DeskBar's** PsL registration ID is 14896.

THE ABOVE NUMBERS ARE FOR CREDIT CARD ORDERS ONLY.

THE AUTHOR OF THIS PROGRAM CANNOT BE REACHED AT THESE NUMBERS.

Any questions about the status of the shipment of the order, refunds, registration options, product details, technical support, volume discounts, dealer pricing, site licenses, non-credit card orders, etc, must be directed to Burrell Software Enterprises.

Upon receipt of your registration fee, you will be e-mailed or postal mailed your registration code, along with instructions for registering your copy of **DeskBar**. E-mail is preferred to provide you with the fastest service.

Invoices will be sent out on request.

LIMITED WARRANTY AND REMEDIES

THE PROGRAM IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL THE AUTHOR BE LIABLE TO YOU FOR ANY DAMAGES, INCLUDING INCIDENTAL OR CONSEQUENTIAL DAMAGES, ARISING OUT OF THE USE OF THE PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. YOU ACKNOWLEDGE THAT YOU HAVE READ THIS LICENSE, UNDERSTAND IT AND AGREE TO BE BOUND BY ITS TERMS AS THE COMPLETE AND EXCLUSIVE STATEMENT OF THE AGREEMENT BETWEEN US, SUPERSEDING ANY PROPOSAL OR PRIOR AGREEMENT, ORAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN US RELATING TO THE SUBJECT MATTER OF THIS LICENSE.

DeskBar is a shareware program and is provided at no charge to the user for evaluation. Feel free to share unlicensed copies with your friends, but please do not give it away altered or as part of another system. The essence of shareware software is to provide personal computer users with quality software without high prices, and yet to provide incentive for programmers to continue to develop new products.

If you find **DeskBar** useful and find that you continue to use it after a reasonable trial period, you must make a registration payment of \$25.00 to Burrell Software Enterprises. This registration fee will license one copy for use on any one computer at any one time. You must treat this software just like a book. An example is that this software may be used by any number of people and may be freely moved from one computer location to another, so long as there is no possibility of it being used at one location while it's being used at another. Just as a book cannot be read by two different persons at the same time.

Site license arrangements may be made by contacting Burrell Software Enterprises.

Registered User License Agreement

This is a legal agreement between you (either an individual or an entity) and Burrell Software Enterprises. By using **DeskBar**, you agree to be bound by the terms of this Agreement. If you do not agree to the terms of this Agreement, promptly delete the **DeskBar** package from your system.

SOFTWARE LICENSE

- 1. GRANT OF LICENSE.** This License Agreement (License) permits you to use one copy of the software product identified above, which may include user documentation provided in on-line or electronic form (SOFTWARE). The SOFTWARE is licensed as a single product. Its component parts may not be separated for use on more than one computer or by more than one user at any time. The SOFTWARE is in use on a computer when it is loaded into the temporary memory (i.e. RAM) or installed into the permanent memory (e.g. hard disk) of that computer. If the SOFTWARE is permanently installed on the hard disk or other storage device of a computer and one person uses that computer more than 80% of the time, then that person may also use the SOFTWARE on a portable or home computer.
- 2. COPYRIGHT.** The SOFTWARE is owned by Burrell Software Enterprises and is protected by United States copyright laws and international treaty provisions. Therefore you must treat the SOFTWARE like any other copyrighted material (e.g. a book or musical recording). You must not redistribute the file DESKBAR.LIC, which licenses your copy of the software.
- 3. OTHER RESTRICTIONS.** This License is your proof of license to exercise the rights granted herein and must be retained by you. You may not rent or lease the SOFTWARE, but you may transfer your rights under this License on a permanent basis, provided you transfer this License, the SOFTWARE and any accompanying printed materials, retain no copies, and the recipient agrees to the terms of this License. You may not reverse engineer, decompile, or disassemble the SOFTWARE, except to the extent the foregoing restriction is expressly prohibited by applicable law.

LIMITED WARRANTY

LIMITED WARRANTY. Burrell Software Enterprises warrants that the SOFTWARE will perform substantially in accordance with the accompanying on-line documentation for a period of 101 days from the date of registration.

CUSTOMER REMEDIES. Burrell Software Enterprises' entire liability and your exclusive remedy shall be return of the price paid. This Limited Warranty is void if failure of the SOFTWARE has resulted from accident, abuse, or misapplication.

NO OTHER WARRANTIES. To the maximum extent permitted by applicable law, Burrell Software Enterprises disclaims all other warranties, either express or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the SOFTWARE and any accompanying written materials.

NO LIABILITY FOR CONSEQUENTIAL DAMAGES. To the maximum extent permitted by applicable law, in no event shall Burrell Software Enterprises be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or other pecuniary loss) arising out of the use or inability to use the SOFTWARE, even if Burrell Software Enterprises has been advised of the possibility of such damages.

Definition of Shareware

Shareware distribution gives users a chance to try software before buying it. If you try a Shareware program and continue using it, you are expected to register. Individual programs differ on details -- some request registration while others require it, some specify a maximum trial period. With registration, you get anything from the simple right to continue using the software to an updated program with printed manual.

Copyright laws apply to both Shareware and commercial software, and the copyright holder retains all rights, with a few specific exceptions as stated below. Shareware authors are accomplished programmers, just like commercial authors, and the programs are of comparable quality. (In both cases, there are good programs and bad ones!) The main difference is in the method of distribution. The author specifically grants the right to copy and distribute the software, either to all and sundry or to a specific group. For example, some authors require written permission before a commercial disk vendor may copy their Shareware.

Shareware is a distribution method, not a type of software. You should find software that suits your needs and pocketbook, whether it's commercial or Shareware. The Shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is low, prices are low also. Shareware has the ultimate money-back guarantee -- if you don't use the product, you don't pay for it.

Distribution

Anyone distributing **DeskBar** for any kind of remuneration must first contact Burrell Software Enterprises for authorization. This authorization will be granted at the discretion of Burrell Software Enterprises. Burrell Software Enterprises must be advised so that the distributor can be kept up-to-date with the latest version of **DeskBar**.

You are encouraged to pass a copy of **DeskBar** along to your friends for evaluation. Please encourage them to register their copy if they find that they can use it. All registered users will be notified of the most recent version of **DeskBar** and where to obtain it.
