

Welcome to **DiskMan©**

DiskMan© will print professional quality labels for your floppy disks as well as keep track of all your files on your floppies, Bernoullis, and hard drives. Without typing a single letter, you will be able to label all your disks, keep a log of all your disks, and make a printout .

Since you probably already keep your disks in some type of storage box, **DiskMan©** will keep your files separated by storage box. By the way, **DiskMan©** will use whatever labels you have around, no need to hunt for a specific type. It is a little easier with the standard Avery disk labels. I'll send you a sample with your registration fee or order a whole box. See Orderfrm.wri for the details.

So if you are tired of hunting around for a disk, or just want to make your disks look better and easier to put your hands on, this is the program for you. Give it a try, and if you like it, please print out the attached order form (Orderfrm.wri) and send \$20.00 to become a registered user. We'll send you all updates for 12 months and some labels to get started.

To get started, print out **DiskMan.wri**.

Please send upgrade suggestions to me:
