

About The Author

Kevin is currently a prospective Industrial (Product) Design undergraduate and is in the hole financially (as all college students are these days). So remember to send in that shareware fee! He may be reached through Internet at kevinh@ocf.berkeley.edu or America Online as Kev Hughes. He is for hire and is willing to work with anyone in helping develop and/or design HyperCard stacks or produce PostScript artwork and/or computer-aided graphic design.

Synectic Engineering - "The trouble with the future is that it usually arrives before we're ready for it"
