

Shareware Information

This program is shareware. That means that you can give away as many copies as you want, but if you use it, be a decent person and send me \$10.00 for my time and trouble. I mean, I program the Mac for fun, but I have to pay the rent somehow.

If you have registered a previous version of Notify, you do not need to register again.

You can register Notify electronically if you have a CompuServe account: GO SWREG, select Register Shareware, select Search by Registration ID, then request ID #284.

There is a shareware registration form included in this chapter. Print this chapter, and send the completed form with \$10 US to

Steve Stockman
Sonflower Softworks
219 S. Barrington Ave. #3
Los Angeles, CA 90049-3324

If you would like to install Notify on several machines, the site license fee is \$10 US times the square root of the number of users. For example, a ten-user license would be \$31.62. (Note that a site license fee must be mailed; CompuServe SWREG will not do this calculation, but would just charge a flat \$10 per copy.)

Thanks,
Steve
