

## Welcome to this "electronic version" of MacGames Digest™

This is a pared down version of our newsletter that is mailed every two months to our subscribers. This version contains only the text portion of the reviews in issue one that was mailed in October.

Issue two will be mailed in the third week of November and will include reviews on Capitalist Pig, SimLife, Dark Queen of Krynn, SpaceWard HO!, Tristan, Playmaker Football, and Prince of Persia. Plus previews of SpaceWard HO! version 3.0, Pax Imperia and Lemmings. But there will be even more than that. We still in the planning stages now.

To subscribe send a check or money order for \$12.00/year (U.S. funds) plus your name and address to:

MacGames Digest™  
860 E. Norton Ave.  
Muskegon, MI 49444  
(Make check payable to MacGames Digest)

The \$12.00 subscription rate is only in effect until issue two is mailed in the third week of November. After that rates go up to \$18.00/year.

Those who get in on this special rate will be assured this rate as long as they want. Also those who subscribe at this special rate will get as a bonus a special two page preview on those months that an issue is not published.

One more thing, issues one and two are offered on a money back basis. If for any reason you don't like issue two send it back marked "REFUND" and get all your money back.

That's all from here except to say that this is the last electronic version we will be distributing for some time. I hope you enjoy.

Dean Davis - Editor MacGames Digest
