

◦ HELP - Exclusions

This dialog allows you to specify names of items that you do NOT want cataloged. These can include files, folders, volumes, or SCSI ID's.

Simply type in the name to be added to the exclusion list and hit the ( Add ) button.

Examples of possible entries for this list include:

TeachText ( An application on many disks. )  
System Folder ( A Folder on many disks. )  
Untitled ( This might make you name things! )  
Scratch Disk ( A volume you use for temporary stuff. )  
SCSI #3 ( A CD drive you never want to catalog. )

To remove an entry, select it and hit the ( Remove ) button.
