

MacLifeInsurance

MacLifeInsurance is a set of two control panels that will protect your work from system crashes, accidental deletions, power outs, corrupted files, and other Macintosh disasters with two levels of protection.

MacLifeInsurance—FileSaver will protect you at the file level, by automatically saving your files by time and/or number of key strokes as you specify.

MacLifeInsurance—KeySaver will protect you at the keystroke level, saving every key you type, so that you'll always be able to retrieve your work—no matter what happens.

These two levels of protection will give you piece of mind—and save you hours of aggravation in the case of a Macintosh disaster. All for a one-time premium (otherwise known as a shareware fee) of only \$14.95. That's with no deductibles and lifetime protection. (Too bad all insurance isn't this inexpensive!)

A must for every Mac user!

How to order:

MacLifeInsurance is only \$14.95! (Also available with the System 7 Pack! for only \$39.95!)

Phone: 800-368-5195 or 303-872-8651. (24 hours a day, 7 days a week)
