

Version 1.5 of *DJ_BothSides for Windows* for the HP Deskjet family of printers is available now. Enhancements and bug fixes include:

- Toolbar access to frequently-used commands and options.
- New 'Autosave' menu item.
- Print a 'dragged and dropped' file.
- Last four files selected or 'dragged and dropped' remembered.
- Progress of print run on main window's status line.
- [Abort] button on toolbar replaces [Esc] key; [PgUp] key withdrawn.
- Help text expanded and at a more readable point-size; graphics in help improved.
- Exit if Windows version earlier than 3.1.
- Special cursors removed.
- New licensing algorithm that discourages illegal copying. You should not have problems with it: but guard against accidental corruption of *BothSides'* files by backing them all up to diskette on receipt.
- Too small dialogue text in some environments cured.
- Multi-tasking performance and handling of paper misfeeds improved.
- A folded output bug, where part of a page was occasionally lost, has been corrected.
- 'Out-of-bounds' crash prevented for certain unusual documents.
