ENVIRONMENTAL ENGINEER

OBJECTIVE:

To serve as an environmental project manager or supervising engineer/scientist with a major consulting company or industrial organization and advance to an executive position.

EXPERIENCE:

SENIOR CONSULTANT, **Riverside Environmental Consultants, Inc.**, Bergen, N.J., 1990-present

Riverside employs 900 specialists and provides environmental engineering, industrial hygiene, and employee safety services to commercial and government organizations in the USA and Canada. As a senior consultant, I:

- ▣ Review area maps, plant-site layouts, blueprints, waste-treatment specifications, hazard files, and permits of clients.
- ▣ Survey surface and subsurface soil, storage areas, electrical facilities, waste-disposal systems, and wetland environments for clients.
- ▣ Prepare documents that recommend, plan, and report corrective measures for hazardous sites; present oral and written reports for clients and agencies.

PROTECTION SCIENTIST, **Lenapi Chemical Company**, Meadows, N.J., 1987-1990
Lenapi employs 500 persons. It supplies standard and tailored chemical compounds to industrial consumers. I left Lenapi to concentrate on environmental consulting. As a protection scientist, I:

- ▣ Surveyed Lenapi environmental and industrial hygiene risk areas.
- ▣ Resolved problems of environmental exposures, product quality, and employee safety.

EDUCATION:

MASTER OF SCIENCE, ENVIRONMENTAL ENGINEERING, **Carteret College of Engineering**
Edison, New Jersey, June 1991

BACHELOR OF SCIENCE, CHEMICAL ENGINEERING, **Carteret College of Engineering**
Edison, New Jersey, June 1987

QUALIFICATIONS:

Professional Engineer (PE). Knowledge of NJD&P, SARA, OSHA.
