Hip Room (Fr/Rr)	49.2/50.9	49.2/50.9

Overview:

Chevy's Budget Sporty Coupe

Since its introduction in 1988, the Beretta has served many roles in the Chevrolet lineup. In four-cylinder form, it's a reasonably-priced coupe offering a modicum of style, while with a V6 power plant and the usual styling and suspension tweaks, it becomes essentially a bargain-priced Camaro.

That situation will continue for model year 1995, although Chevrolet's all-new and dramatically-styled Cavalier coupe is sure to draw a lot of attention away from the familiar Beretta. And while Chevy's new Cavalier will be available only with four-cylinder drivetrains, Beretta Z26 models now offer a smooth, 3.1-liter V6 of 160-HP, the previous "Quad 4" optional power plant having been dropped for '95. Beretta should remain a popular alternative for young buyers interested in a two-door coupe with sporty overtones, but without the Camaro-level insurance premiums (which in some cases can exceed the car payments).

While the Beretta doesn't offer the freshest styling in the Chevrolet showroom, it remains a known quantity for salesman and customer alike, and for those who prefer two-door styling on a budget, it deserves a look.

Beretta buyers averaged just under 37 years of age during 1994; over one-quarter were under 25. Nearly two-thirds were female.
