Leg Room (Fr/Rr)	41.9/36.4
Shldr Room (Fr/Rr)	65.4/66.0
Hip Room (Fr/Rr)	60.0/60.7

### Overview:

*A Blazer By Any Other Name...*

Chevrolet has renamed its full-size two-door sport utility vehicle "Tahoe" for model year 1995. The 111.5-inch wheelbase two-door continues with its 5.7-liter, 200-HP gasoline V8, mated to either a five-speed manual or four-speed automatic transmission. New for model year 1995, in addition to the new model designation, is a driver's airbag. The instrument panel has been revised, along with door panels and seats, which have a softer look than previously. Four-wheel antilock brakes remain standard equipment. Options include a 6.5-liter turbocharged diesel V8 of 180-HP.

Early in calendar year 1995, Chevrolet will add a four-door Tahoe to its full-size sport utility lineup. This new bodystyle will combine four-door convenience with trimmer exterior dimensions than previous full-size four-door sport utilities, for improved maneuverability. It will be nearly two feet shorter than Chevy's Suburban four-door utility vehicle, with shorter rear doors and reduced rear overhang. It will share the same choice of gasoline or turbo-diesel V8 drivetrains as its two-door counterpart. Four-door Tahoes will arrive at dealers in early spring.

Full-size 1994 Chevrolet Blazer purchasers averaged in their early forties, at about 41. Eighty percent were men.
