Overview:

Midsize Value for Money Contender

Hyundai completely revised their midsize Sonata four-door sedan for model year 1994, deciding to market it as an early '95. Hyundai gave its latest Sonata a significantly more rounded and aerodynamic exterior design, and slightly increased the car's overall dimensions, with a wheelbase of 106 inches--equal to a Ford Taurus--and an overall length of 185 inches.

A choice of four cylinder and V6 power plants is offered, the entry-level four cylinder developing 137-HP, while Hyundai's optional Mitsubishi-supplied 3.0-liter V6 puts out 142-HP. The four cylinder can be had with either a five-speed manual or four-speed automatic transmission, while the V6 is mated to a four-speed automatic only. The advantage of the larger V6 isn't so much the few additional horsepower, but a sizable increase in low-speed torque, which makes the V6 more responsive in typical driving.

The '95 Sonata also includes driver and passenger airbags; ABS brakes are available as an option. Buyers of 1994 Hyundai Sonatas had a median age of about 36. The majority were women.
