Interior Dimensions:

Head Room (Fr/Rr)	37.2/36.3
Leg Room (Fr/Rr)	41.2/34.3
Shldr Room (Fr/Rr)	57.3/57.3
Hip Room (Fr/Rr)	55.7/60.3

Overview:

Facelifted Felines from Coventry

Jaguar's familiar XJ sedans have been given a major facelift for the 1995 model year, consisting of all-new front and rear styling, offering a return to the fluid shapes of the British automaker's classic sedans of the past. An all-new front end reverts to four round headlights at the end of curving front fenders and hood. The new XJ sedan's rear sheet metal is all new and more gracefully sculpted than in the recent past, again evoking a modern version of traditional Jaguar styling. Passenger compartment dimensions are virtually unchanged, except for additional rear seat headroom.

Under the bonnet, the XJ sedan uses an updated version of the previous car's 4.0-liter 24-valve inline six cylinder engine, now rated at 245-HP for 1995. A supercharged, 322-HP version of the 4.0-liter six is also offered in a limited-edition "XJR" model. Naturally, Jaguar's famous 6.0-liter V-12 power plant continues in XJ12 versions. Technically, the new XJ sedans feature driver and passenger airbags, anti-lock brakes, and add traction control to the Jaguar standard equipment list for the first time. As expected, the interior continues to emphasize fine leather and wood in a way unique to the British.

Owners of Jaguar's slinky XJ6/XJ12 sedans had a median age of 56 in 1994; less than fifteen percent were under age 40. Drivers were evenly split between men and women.
