Accessing items in Corel GALLERY

Accessing items in Corel GALLERY

Corel GALLERY provides three different pages you can use to access clipart, photos, Web images, animations, sounds, and videos included on the Corel GALLERY 1,000,000 CD-ROMs: the Search page, the Browse page, and the Favorites page. The Search page helps you find items that share common subject matter. The Browse page lets you view items by categories on the CD-ROMs. The Favorites page lets you quickly access the items you use most often.

{button ,AL(`OVR Accessing items in Corel GALLERY;',0,"Defaultoverview",)} **More Detailed Information**

Using the Search page
How to...

Using the Search page

The Search page lets you find clipart and photos by searching for keywords. For example, if you want to find a photo for a newsletter about owning pets, you can search for the keyword "dogs" or "cats"; or you can even use both keywords to search for photos that have both dogs and cats. You can search though individual categories, any one of the Corel GALLERY 1,000,000 CD-ROMs, or search the entire collection of Corel GALLERY 1,000,000 CD-ROMs. Thumbnails of the items found by your search are displayed in the Thumbnail View area of the Search page.

 Tip

- You can switch to the Search page from another page by pressing ALT + S.

_____

{button ,AL(`OVR Accessing items in Corel GALLERY;',0,"Defaultoverview",)} <u>**Related Topics**</u>

Accessing items using the Search page

In the Search page, you use keywords to find clipart and photos available on the Corel GALLERY 1,000,000 CD-ROMs. Keywords are descriptive terms that are assigned to the clipart and photos on the Corel GALLERY 1,000,000 CD-ROMs. When you search for one or more keywords, Corel GALLERY displays clipart or photos that match your search.

You can use multiple keywords when performing a search. Type as many keywords as you need, with a space between each one.

In the Search page, you can search for sounds, videos, and animated GIFs by format only, not by subject. For example, you can search for WAV sounds, or AVI videos, but not sports sounds, or business videos.

To access items in the Search page

1. Click the Search tab.
2. Type the word(s) you want to search for in the Search For box.
3. Choose one of the following categories from the In list box:
   - Clipart—searches clipart only
   - Photos—searches photos only
   - All Categories—searches clipart and photos
4. Choose one of the following options from the Matching list box:
   - Any—returns items that contain one or more of the keywords chosen
   - All—returns items that contain all the keywords chosen
5. Choose one of the following options from the Keyword list box:
   - Exactly—returns items with keywords that match the word(s) in the Search For box exactly
   - Partially—returns items with keywords that match the word(s) in the Search For box, and items with keywords that contain the word(s) in the Search For box
6. Click Start.

To search for sounds, videos, and animated GIFs

1. Click the Search tab.
2. Type one or more of the following words in the Search For box.
   - sound, wav, midi—search for sounds
   - video, movie, avi—search for videos
   - animated—searches for animated gifs
3. Choose All Categories from the In list box.
4. Choose Any from the Matching list box.
5. Choose Exactly from the Keyword list box.
6. Click Start.

Notes

- The images in the WebSpice Collection do not have keywords, and are not included in searches done from the Search page.
- The Search For box lists the last ten keywords you entered. You can search for a previous keyword by choosing it from the Search For box on the Search page.
- For information about changing the settings for your searches, see Customizing searches.

Tip

- When you view details about icons, you can view a column that shows you the relevance of the search results to your search criteria. To view details about icons, click View, Details.

{button ,AL(`PRC Using the Search page;',0,"Defaultoverview",)} Related Topics

Searching for items from the Corel GALLERY 1,000,000 User Guide

Once you have customized Corel GALLERY to search for filenames in the Corel GALLERY 1,000,000 User Guide, you search for the name of any file that appears in the Corel GALLERY 1,000,000 User Guide.

When you perform a search with the Search File Names (Only Exact Match Performed) check box enabled, Corel GALLERY searches for the exact filename and, for items that have the filename as a keyword. Some of the search settings you choose on the Search page are applied to the keyword search only. The file name search only returns exact matches. For example, if you type "Pig" in the Search For box, the item with the file name PIG.GIF will be returned, but not the item PIGEON.CCX, even if you choose "Partially" from the Keyword list box.

The setting you choose from the In list box applies to the file name search. For example, if you want to search for a button or theme from the Corel GALLERY 1,000,000 User Guide, you have to choose "All Categories" from the In list box. If you choose "Photos," then Corel GALLERY only searches the photos.

To customize Corel GALLERY to search for file names in the Corel GALLERY 1,000,000 User Guide

1. Click View, Search Settings.
2. Enable the Search File Names (Only Exact Match Performed) check box.

To search for a file in the Corel GALLERY 1,000,000 User Guide

1. Click the Search tab.
2. Type the filename in the Search For box.
3. Choose All Categories from the In list box.
4. Choose All from the Matching list box.
5. Choose Exactly from the Keyword list box.
6. Click Start.

Note

- The files that appear in the WebSpice section of the Corel GALLERY 1,000,000 User Guide are shown as examples only. You cannot perform a search on the filenames that appear in this section.

Opening images and folders using the Search page

You can open images and folders using the Search page. When you open an image, it launches in its associated application. When you open the folder in which an image is stored, it opens in Windows Explorer.
To open an image using the Search page

- Double-click the image's thumbnail in the Thumbnail View area.

To open the folder in which an image is stored

- Click the image's thumbnail in the Thumbnail View area, and click File, Open Containing Folder.

{button ,AL(`PRC Using the Search page;',0,"Defaultoverview",)} <u>Related Topics</u>

Customizing searches

You can customize the searches you perform on the Search page by changing your search settings. Customizing a search lets you change the extent of your searches and lets you add and remove CD-ROM drives from Corel GALLERY searches.

When customizing Corel GALLERY to access the Corel GALLERY 1,000,000 CD-ROMs over a network, you must specify the network path to each Corel GALLERY 1,000,000 CD-ROM.

To add a CD-ROM drive to the search

1. On the Search page, click Edit, Search Settings.
2. Click a CD-ROM drive in the Search Paths box.
3. Click the Add button.

To remove a CD-ROM drive from the search

1. On the Search page, click Edit, Search Settings.
2. Click a CD-ROM drive in the Paths To Library Content box.
3. Click the Remove button.

{button ,AL(`PRC Using the Search page;',0,"Defaultoverview",)} Related Topics

Using the Browse page

How to...

Using the Browse page

The Browse page lets you find clipart, photos, Web images, animations, sounds, and videos by searching through folders, similar to how you use Windows Explorer. For example, if you want to find clipart for a brochure for a store that sells musical instruments, you can put a Corel GALLERY 1,000,000 CD-ROM in your CD-ROM drive, then use the Browse page to open the CLIPART folder, then the MUSIC folder. Thumbnails of the items in the folder are displayed in the Thumbnail View area of the Browse page.

 Tip

- You can switch to the Browse page from another page by pressing ALT + B.

_____

{button ,AL(`OVR Accessing items in Corel GALLERY;',0,"Defaultoverview",)} **Related Topics**

Accessing items using the Browse page

The Browse page lets you find items by looking in the category folders on the Corel GALLERY 1,000,000 CD-ROMs. This is a useful way to find items when you know where they are stored or when you want to view all the thumbnails in a category.

To access items using the Browse page

1. Click the Browse tab.
2. Double-click the drive in which the item is stored.
3. Double-click the folder in which the item is stored.

Opening images and folders using the Browse page

You can open images and folders using the Browse page. When you open an image, it launches in its associated application. When you open the folder in which an image is stored, it opens in Windows Explorer.

To open an image using the Browse page

- Double-click the image's thumbnail in the Thumbnail View area.

To open the folder in which an image is stored

- Click the image's thumbnail in the Thumbnail View area, and click File, Open Containing Folder.

{button ,AL(`PRC Using the Browse page;',0,"Defaultoverview",)} Related Topics

Playing sounds and videos using the Browse page

You can play sounds and videos using the Browse page. When launched, the sound or video will play on the associated media player on your computer.

To play a sound using the Browse page

- Double-click the sound's thumbnail in the Thumbnail View area.

Note

- In order to hear Corel GALLERY 1,000,000 sounds, you must have a sound card and speakers installed on your computer.

To play a video in the Browse page

- Double-click the video's thumbnail in the Thumbnail View area.

Note

- The videos in Corel GALLERY 1,000,000 do not have sound.

{button ,AL(`PRC Using the Browse page;',0,"Defaultoverview",)} Related Topics

Using the Favorites page

Using the Favorites page

The Favorites page gives you instant access to clipart, photos, Web images, animations, sounds, and videos stored in your Favorites folders. When you find an item that you like, you can add a shortcut to it to a Favorites folder; then whenever you want to use that item, you can access it without having to browse to or search for it. For example, if you are creating seven versions of a restaurant menu, you can add the clipart you want to use in each version of the menu to a Favorites folder.

The folder GALLERY FAVORITES is automatically created when you install Corel GALLERY 1,000,000. You can store shortcuts to all your favorite items in this folder, or you can create folders within the GALLERY FAVORITES folder to help you organize your favorite items. For example, if you want to keep your children's favorites in a separate folder, you can create a folder named KID'S FAVORITES.

Tip

- You can switch to the Favorites page from another page by pressing ALT + A.

{button ,AL(`OVR Accessing items in Corel GALLERY;',0,"Defaultoverview",)} **Related Topics**

Accessing items using the Favorites page

In the Favorites page, you can access items that you have added to your Favorites folders. The Favorites page lets you keep track of items that you want to use again, and allows you to access these items quickly. You do this by adding items you like to Favorites folders.

To access items in a Favorites folder

1. Click the Favorites tab.
2. Double-click the Favorites folder you want to open.

To play a video in the Favorites page

- Double-click the video's thumbnail in the Thumbnail View area.

Note

- The videos in Corel GALLERY 1,000,000 do not have sound.

{button ,AL(`PRC Using the Favorites page;',0,"Defaultoverview",)} Related Topics

Adding and removing items in the Favorites page

The Favorites page lets you quickly access clipart, photos, Web images, animations, sounds, and videos on the Corel GALLERY 1,000,000 CD-ROMs that you use often. When you find an item you are going to use on a regular basis, for example, in many different versions of a document, you can add it to the Favorites page. This way, when you want to use that item again, you can click on the Favorites tab, click on the appropriate folder, and the thumbnail of the file will be displayed.

To add an item to a Favorites folder

- Right-click the icon or thumbnail of an item in the Thumbnail View area in the Search page or the Browse page, and click Add To Favorites.

To remove an item from a Favorites folder

- Right-click a icon or thumbnail in the Thumbnail View area in the Favorites page, and click Delete.

Note

- You can only add items on the Corel GALLERY 1,000,000 CD-ROMs to Favorites folders.

_____

{button ,AL(`PRC Using the Favorites page;',0,"Defaultoverview",)} Related Topics

Creating Favorites folders

When you install Corel GALLERY 1,000,000, the folder GALLERY FAVORITES is created automatically. You can create as many Favorites folders as you want in the GALLERY FAVORITES folder. For example, if you want to create wedding invitations and placecards, you can create a Favorites folder called WEDDING FAVORITES, in which you can store all the favorite clipart you want to use in the projects for the wedding.

To create a Favorites folder

1. Click the Favorites tab.
2. Right-click the background of the Thumbnail View area, and click New, Folder.
3. Right-click the New Folder, and click Rename.
4. Type a name for your folder, and press ENTER.

{button ,AL(`PRC Using the Favorites page;',0,"Defaultoverview",)} <u>Related Topics</u>

Accessing fonts

Accessing fonts

Fonts in Corel GALLERY 1,000,000 can only be accessed through the Corel GALLERY 1,000,000 setup. You can install more fonts at any time by running the Corel GALLERY 1,000,000 setup program, choosing Full Setup with Fonts, and enabling the check boxes of the fonts you wish to install.

The fonts included in Corel GALLERY 1,000,000 are True Type fonts.

To install fonts included in Corel GALLERY 1,000,000

1. Insert Corel GALLERY 1,000,000 CD-ROM #1 in your CD-ROM drive.
2. Click the Start button on the Windows taskbar, and click Run.
3. Click the Browse button.
4. Choose your CD-ROM drive from the Look In list box.
5. Double-click SETUP.EXE.
6. Follow the instructions on your screen for a Full Setup With Fonts, and specify the fonts you want to install.

Note

- A Full Setup With Fonts installs all of the applications included with Corel GALLERY 1,000,000 on your computer. You can uninstall these programs at any time.
- You can also install fonts by dragging them from the FONTS folder on the Corel GALLERY 1,000,000 CD-ROM Disc 1 to your Windows FONTS folder.

Welcome to Corel GALLERY 1,000,000

Welcome to Corel GALLERY 1,000,000

Corel GALLERY 1,000,000 is a collection of clipart, professional photos, Web images, animations, sounds, videos, and fonts. Whether you are creating a brochure for your business, an invitation for an anniversary party, or an assignment for school, Corel GALLERY 1,000,000 has the right item for your project.

Corel GALLERY 1,000,000 includes Corel GALLERY, a program that gives you three easy ways to find the perfect clipart, photo, Web image, animation, sound, or video.

- Know what you're looking for? Navigate directly to where the item is stored on the Corel GALLERY 1,000,000 CD-ROMs using the Browse page.

- Need items relating to a certain subject? Use the Search page to search for items on any subject by keyword.

- Want to use a certain item again? Add your favorite items to the Favorites page to keep them at your fingertips.

Using Corel GALLERY 1,000,000 items in files created with other applications word processing, spreadsheet, presentation, HTML editing programs, for example

is as easy as dragging the thumbnail of the item to the file you are creating.

Corel services and support

Corel services and support

Corel is committed to providing customers with high-quality technical support. The following sections describe the variety of support services available. The terms of Corel technical support offerings are subject to change without notice.

Classic technical support services

1-613-728-6173 (North America only)

One free technical support incident is available to Corel customers from Corel Technical Support. A support incident is defined as the resolution of one technical question, problem, or issue, regardless of the number of calls required to resolve it. Corel representatives are available to respond to your call from Monday to Friday, 8:30 am. to 7:30 pm. Eastern Time.

During and after your Classic technical support period, you can also use the following services:

- Priority support services
- World Wide Web Site

{button ,AL(`OVR Welcome to Corel GALLERY 1000000;',0,"Defaultoverview",)} **Related Topics**

Priority support services

Corel offers the following technical support options, most of which are available 24 hours a day, 365 days a year. These services are useful if you prefer not to pay for support or encounter problems during off-hours.

IVAN (Interactive Voice Answering Network)

The Interactive Voice Answering Network contains answers to commonly asked questions about Corel products and is available 24 hours a day, 365 days a year. It is regularly updated with the latest information, tips, and tricks. You can also request that IVAN's solutions be faxed to you. There is no charge for this service beyond the cost of the telephone call.

US/Canada   1-613-728-1937

Rest of world   +353-1-708-2525 (Ireland)

Automated FAX On Demand

Technical Support maintains an Automated FAX On Demand system of numbered documents that contain up-to-date information about common issues, tips, and tricks. This service is available 24 hours a day, 365 days a year.

(613) 724-3456

You will be asked for a document number and your fax number. The document you request is automatically faxed to you. To have a catalog of documents faxed to your, call the Automated FAX on Demand system number and request document 2000.

{button ,AL(`OVR Welcome to Corel GALLERY 1000000;',0,"Defaultoverview",)} <u>Related Topics</u>

CompuServe

Interact with other users and Corel volunteers to obtain product information and support. CompuServe is available 24 hours a day, 7 days a week, including holidays. Corel volunteers will respond from 8:30 am to 5:00 pm Eastern Time, from Monday to Friday, excluding holidays.

If you have a CompuServe membership, you can access Corel technical information by entering one of the following at the CompuServe prompt:

GO COREL (for English)

GO CORELGER (for German)

GO CORELFR (for French)

GO CORELLATIN (for Spanish)

GO CORELNL (for Dutch)

GO CORELSCAN (for Scandinavian)

Viewing program and system information

Corel GALLERY provides easy access to information about the application and your system.

Program information consists of the application name, version number, serial number, and user name. This information doesn't change. You'll find it particularly useful if you ever need help from Corel Technical Support Services.

System information consists of details about any of the following categories: system, display, printing, Corel .EXE and .DLL files, and system .DLL files. For example, you can see how much memory you have on the drive to which you want to save a file. You can save any system information in a text file called SYSINFO.TXT.

To view program and system information

1. Click Help, About Corel GALLERY.

2. Click the System Info button to view system information.

3. Choose a category from the Choose A Category list box.

Note

- Click Save to store system information for printing. System information is saved in the file SYSINFO.TXT. A message box tells you where the file is saved.

Getting started

Getting started

Corel GALLERY lets you find the clipart, photos, Web images, animations, sounds, and videos you want quickly and easily. Before you get started in Corel GALLERY, you should be familiar with the following concepts:

Clipart

Clipart images are ready-made images for use in all kinds of applications. Corel GALLERY 1,000,000 clipart are vector images, stored in Corel Compressed Exchange file format (.CCX). This format is ideal for use in CorelDRAW, Corel PHOTO-PAINT, and Corel VENTURA 8. Corel GALLERY can also convert clipart to formats that can be used in other applications, such as Corel WordPerfect and Microsoft Office applications.

Photos

Corel GALLERY 1,000,000 photos are bitmap images, stored in Wavelet Compressed Bitmap file format (.WI).

Vector images and bitmaps

For information about the difference between vector images and bitmaps, see Understanding vector and bitmap images.

Web images

Web images are images for special use in HTML documents. Corel GALLERY 1,000,000 Web images are stored in GIF format (.GIF).

Animations

Animations in Corel GALLERY 1,000,000 are animated GIFs Web images that move. You can incorporate Corel GALLERY 1,000,000 animated GIF files into HTML documents as you do other image files.

Sounds

Sounds included in Corel GALLERY 1,000,000 are stored in two file formats: MIDI (.MID) and Wave (.WAV). Sound files can be played using Microsoft Windows Sound Recorder or a compatible application on your computer.

Videos

Corel GALLERY 1,000,000 videos are stored in Video for Windows file format (.AVI) and played using the Microsoft Windows Video Recorder or a compatible application on your computer.

Fonts

A font is a set of characters that usually includes the alphabet and several other symbols. Each font has different characteristics that change its appearance. The font you choose for your text can completely change the mood of your message.

Examples

Thumbnails

Thumbnails are small, low resolution images displayed in the Thumbnail View area on the Corel GALLERY desktop to represent items on the Corel GALLERY 1,000,000 CD-ROMs. Thumbnails let you preview images, that is, clipart, photos, Web images, and animations.

Icons

Icons are pictorial representations of Corel GALLERY 1,000,000 items.

{button ,AL(`OVR1 Getting started;',0,"Defaultoverview",)} <u>Related Topics</u>

Understanding vector and bitmap images

This section outlines the differences between vector images, such as the clipart included in Corel GALLERY 1,000,000, and bitmap images, such as the photos included in Corel GALLERY 1,000,000.

If you haven't worked with image-editing programs, you'll find this section especially informative.

What is a vector image?

Vector images, also called object-oriented or draw images, are defined mathematically as a series of points joined by lines. Graphical elements in a vector file are called objects. Each object is a self-contained entity, with properties such as color, shape, outline, size, and position on the screen included in its definition.

Since each object is a self-contained entity, you can move and change its properties over and over again while maintaining its original clarity and crispness and without affecting other objects in the image.

What is a bitmap image?

Bitmap images, also called raster or paint images, are made of individual dots, called pixels (picture elements), that are arranged and colored differently to form a pattern. When you zoom in, you can see the individual pixels that make up the total image. Increasing the size of a bitmap increases individual pixels, which makes lines and shapes appear jagged. Reducing the size of a bitmap also distorts the original image because pixels are removed to reduce the overall image size.

Because a bitmap image is created as a collection of arranged pixels, you cannot change the size, shape, or location of individual pixels. You can, however, refine and apply effects to the entire image.
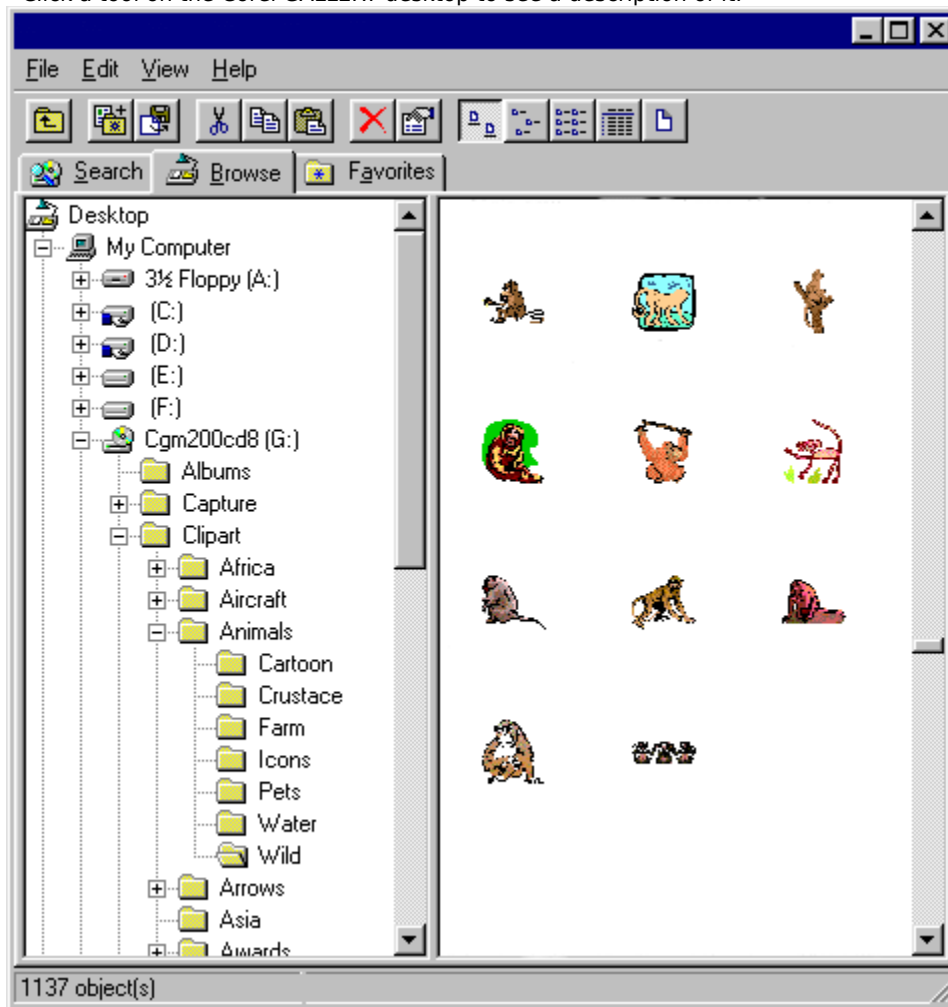

This illustration shows the difference between vector and bitmap images. 1) Vector image 2) Bitmap 3) Some of the shapes used to make 1 4) A close up showing the pixels in 2

{button ,AL(`OVR1 Getting started;',0,"Defaultoverview",)} **Related Topics**

Exploring the Corel GALLERY desktop

Click a tool on the Corel GALLERY desktop to see a description of it.

Depending on the operating system you are using, for example, Windows 95, Windows 95 with Internet Explorer 4.0, Windows 98, or Windows NT, you will notice that various options or buttons differ slightly. For example, the View button in Windows 98 contains a submenu with five view modes, while Windows 95 displays five individual buttons. Shortcut keys may also be different. These differences do not affect the application's functionality; they merely reflect the Windows environment that you are using.

Viewing the Toolbar and Status Bar

The Toolbar gives you quick access to many Corel GALLERY menu commands. The Status Bar, in the lower left corner or the desktop, shows information about such things as objects, ongoing operations, and mouse position.

You can display the Toolbar and Status Bar, or you can hide them to make the Thumbnail View area larger.

To display the Toolbar

- Click View, Toolbar.

  When the Toolbar command in the View menu has a check mark beside it, the Toolbar is displayed.

To display the Status Bar

- Click View, Status Bar.

  When the Status Bar command in the View menu has a check mark beside it, the Status Bar is displayed.

{button ,AL(`PRC Getting started;',0,"Defaultoverview",)} Related Topics

Viewing and hiding the Hints bar

The Hints bar at the left side of the Corel GALLERY desktop gives you useful hints about searching for Corel GALLERY 1,000,000 items. You can hide the Hints bar. If you hide the Hints bar, the Welcome To Corel GALLERY 1,000,000 hint will still appear if you have not performed a search.

Note

- If the Welcome To Corel GALLERY 1,000,000 hint appears in the Thumbnail View area, it will not interfere with your search. Perform your search as usual.

To hide or display the Hints bar

- Click View, Hints Bar.

A check mark next to the Hints Bar menu item indicates that the Hints bar is enabled.

Working with Corel GALLERY 1,000,000 items

Working with Corel GALLERY 1,000,000 items

Once you have found the clipart, photo, sound, or video you want to use, you can easily add it to projects you create using word processing, spreadsheet, presentation, drawing, image-editing, or desktop publishing applications.

Corel GALLERY also lets you save Web images and animations to your computer, rename them, and print them from their associated applications.

{button ,AL(`OVR Working with Corel GALLERY 1000000 items;',0,"Defaultoverview",)} More Detailed Information

Working with clipart and photos

Working with clipart and photos

Corel GALLERY lets you add clipart and photos to projects created in other applications, such as a word processing document, or a slide show. You can use Corel GALLERY to save these items to your computer. You can also open Corel GALLERY clipart and photos in their associated applications.

{button ,AL(`OVR Working with Corel GALLERY 1000000 items;',0,"Defaultoverview",)} **Related Topics**

Adding clipart and photos to your projects

Corel GALLERY gives you three ways to add clipart and photos to your projects. You can drag an item from the Corel GALLERY desktop to the destination application; copy an item to the Clipboard, then paste it into the destination application; or convert the item to a file format you can open in the destination application.

Note

- If you experience difficulty copying and pasting or dragging Corel GALLERY 1,000,000 items into different applications, try using the Paste Special command if it is available in the target application.

To drag clipart or a photo to your project

1. Open your project in the destination application.
2. Drag a thumbnail from the Thumbnail View area of any page in Corel GALLERY to your project.

To copy and paste a piece of clipart or photo

1. Open your project in the destination application.
2. Right-click a thumbnail in the Thumbnail View area of any page, and click Copy.
3. In the destination application, place the cursor where you want to place the item.
4. In most Windows applications, do one of the following:
   - Right-click and click Paste.
   - Click Edit, Paste.

To convert clipart or a photo and add it to your project

1. Click a thumbnail in the Thumbnail View area of any page.
2. Click the Convert button.
3. Choose a folder from the Save In list box.
4. From the Save File As Type list box, choose a file format that the destination application supports.
5. Choose a color depth in the Color Depth list box.
6. Type a filename in the File Name box, click Convert.

   If the Import Into Bitmap dialog box opens, choose the same color depth in the Color list box as you choose in the Color Depth list box in the File Conversion dialog box. If you do not choose the same color depth, the conversion may fail.
7. Open the file in the destination application.
8. In the destination application, follow the procedure to insert a graphic or picture into the file.

{button ,AL(`PRC Working with clipart and photos;',0,"Defaultoverview",)} Related Topics

Using clipart and photos in popular applications

The next four procedures will take you through the process of adding clipart and photos to popular software applications: Corel WordPerfect, Microsoft Word, Corel Presentations, and Microsoft PowerPoint. Each of these procedures is only one way to add clipart and photos to these applications. These procedures will work in most Windows-based applications.

To use clipart in Corel WordPerfect

1. Open the document in Corel WordPerfect.
2. Drag the thumbnail from the Thumbnail View area on the Corel GALLERY desktop to the document in Corel WordPerfect.
3. Resize the clipart image.

To use a photo in Microsoft Word

1. In Corel GALLERY, click the thumbnail in the Thumbnail View area.
2. Click the Convert button.
3. Choose a folder from the Save In list box.
4. Type a filename in the File Name box.
5. Choose Windows Bitmap (.BMP) from the Save As Type list box.
6. In Microsoft Word, click Insert, Picture.
7. Choose the folder in which your photo is stored from the Look In list box.
8. Type the filename of your photo in the File Name box.

To use clipart in Corel Presentations

1. In Corel GALLERY, right-click the thumbnail in the Thumbnail View area and click Copy.
2. In Corel Presentations, right-click a slide and click Paste.

To use a photo in Microsoft PowerPoint

1. Open the presentation in Microsoft PowerPoint.
2. Drag the thumbnail from the Thumbnail View area on the Corel GALLERY desktop to the slide in Microsoft PowerPoint.
3. Resize the photo.

Saving clipart and photos to your computer

You can save Corel GALLERY 1,000,000 clipart and photos in folders stored on your computer. This lets you add items to your projects without using the Corel GALLERY 1,000,000 CD-ROMs. You can save these items to their original file format or to other file formats.

To save clipart or a photo

1. Right-click a thumbnail in the Thumbnail View area of any page, and click Copy.
2. Click the Browse tab.
3. Right-click the folder in which you want to store the item, and click Save.

Note

- In the Browse page, you can also save clipart and photos by dragging a thumbnail from the Thumbnail View area to the folder in which you want it saved.

To convert clipart or a photo to another file format

1. Click a thumbnail in the Thumbnail View area of any page.
2. Click the Convert button.
3. Choose a folder from the Save In list box.
4. Choose a file type from the Save File As Type list box.
5. Type a filename in the File Name box.
6. Choose a color depth in the Color Depth list box.
7. Click Convert.
8. If the Import Into Bitmap dialog box opens, choose the same color depth in the Color list box as you choose in the Color Depth list box in the File Conversion dialog box. If you do not choose the same color depth, the conversion may fail.

The Browse page lets you find items by accessing categories on the Corel GALLERY 1,000,000 CD-ROMs.

The Favorites page lets you organize items you use often and access them quickly.

glossary

Bitmap

An image composed of a series of pixels or dots. Scanners and paint programs, such as Corel Photo House, generate this type of image. By contrast, CorelDRAW creates images using vector objects—shapes stored internally as mathematical equations. Corel GALLERY 1,000,000 photos are bitmap images.

Color mode

Determines the range of colors and tones that are available in an image, and is usually measured by the number of colors displayed, for example 256 colors, or 16 million colors.

The color mode you select for your image affects the file size, as well as the quality of the final image that is printed or displayed on a monitor. Color mode is identified by a number of bits.

CMYK

A color mode made up of cyan (C), magenta (M), yellow (Y), and black (B). In the CMYK color mode, color values are expressed as percentages, so a value of 100 for any ink means that it is being applied at full saturation. Used in most full-color commercial printing, CMYK is like CMY, but the addition of black allows for true blacks and a wider tonal range. The CMYK color mode is based on the CMYK color model.

Pixel

Short for picture element. Pixels are dots on a computer or television screen that combine to form an image. Computer images are created as an array of such dots, each having a specific color.

File compression

Computer files are often stored in a compressed format to save space on your hard disk. There are several compression techniques that can be used, depending on the original file format. Generally, the more compressed a file is, the slower it is read to and/or written to.

Compression can be lossless or lossy. Lossless compression retains all the original data through the compression and decompression processes. Lossless compression is recommended for storing text or numerical data, such as spreadsheets. Lossy compression loses some of the original data, but depending on your requirements, this loss may not make a difference in the final result of your work. Lossy compression can compress your original files to a much greater extent than lossless compression, and so it may be desired when disk space is at a premium.

World Wide Web (WWW)

The graphical component of the Internet. Text and images are displayed on Web sites using HTML coding and GIF and JPEG picture formats. Web documents can be viewed using an Internet browser.

Filter

A program that translates one file format to another or that processes the information in a file to produce a special effect, such as embossing.

Metafile

A metafile is a file format that can contain bitmaps, vector images, and text.

Vector graphics

Graphics created in programs such as CorelDRAW in which shapes are represented as a series of lines and curves. Vector graphics are also referred to as object-based graphics or line art. This contrasts with bitmap graphics, which are created pixel by pixel in paint programs and by scanners. Corel GALLERY 1,000,000 clipart images are vector graphics.

Reference

Year 2000

Operating System (OS) Date Limitation Of January 18, 2038

For many applications, including non-Corel applications, when the operating system date is January 18, 2038 or later, using the application can result in an GPF (General Protection Fault) or other problems. This is not specific to Corel software, but is due to the way the C library code handles date/time information.

Date Display

You can display the date with an explicit century (4-digit year) in the Browse or Favorites page.

To change the Short Date Style

1. Click the Start button on the Windows 95 taskbar.

2. Click Settings, Control Panel, and double-click Regional Settings.

3. Choose a date style with 4 digits in the year, such as "MM/dd/yyyy", in the Short Date Style list box.

Corel's Year 2000 Web Site

Corel Corporation has a Year 2000 policy web site. For the latest information, see "What Does the Year 2000 Mean to Corel Users?" at **http://www.corel.com/2000.htm**.

Uninstalling Corel GALLERY

You can remove Corel GALLERY from your computer and reinstall it at any time.

To uninstall Corel GALLERY

1. Click the Start button on the Windows taskbar.
2. Click Programs, Corel GALLERY 3, Setup And Notes, Corel Uninstaller.

Image file formats

Portable Network Graphics (PNG)

Corel GALLERY can convert images to the PNG file format. PNG is the filename extension for Portable Network Graphics files. The PNG file format is a relatively new Internet graphics format developed as an alternative to the GIF and JPG file formats. To display a Web site that uses PNG images, your Internet Browser may require that you install a plug-in filter that supports this new format. Such plug-ins are readily available on the World Wide Web. The PNG file format is bitmap based.

Windows Bitmap (BMP)

Corel GALLERY can convert images to the BMP file format. BMP is the filename extension for Windows Bitmap files. The BMP file format was developed as a standard to be used across various platforms and is a good general-purpose file format for saving images. The BMP file format does not lend itself well to extensive resizing, because the image tends to become smudged or distorted.

Viewing icons and thumbnails

Viewing icons and thumbnails

The Corel GALLERY desktop displays icons or thumbnails of Corel GALLERY 1,000,000 items. A Corel GALLERY 1,000,000 icon is a pictorial representation of a Corel GALLERY 1,000,000 item. A Corel GALLERY 1,000,000 thumbnail is a miniature, low-resolution version of a Corel GALLERY 1,000,000 item. Thumbnails let you preview images, that is, clipart, photos, Web images, and animations. Even when you are viewing thumbnails, sounds and videos are always represented as icons. The only difference between icons and thumbnails is the view of the way these display the type of item they represent.

The following image displays the difference between icons (left) and thumbnails (right):

You can display icons in a list, and you can view various file properties, such as name, file size, type of file, and date last modified. You can also change the size of thumbnails.

Viewing icons

You can view items as large icons or small icons. Large icons are easier to see than small icons, however, small icons let you view more items at a time.

To view icons

- Do one of the following
  - Click View, Large Icons.
  - Click View, Small Icons.

{button ,AL(`PRC Viewing icons and thumbnails;',0,"Defaultoverview",)} Related Topics

Viewing item information

You can view the file size, file type, and date last modified of each item. You can also view an item's properties, such as location, MS-DOS name, date created, and if the item is Read-only.

To view details about items

- Click View, Details.

To view an item's properties

- Click an item in the Thumbnail View area, and click File, Properties.

Viewing thumbnails

You can view clipart, photos, Web images, and animations as thumbnails.

You can view all bitmap file formats in Thumbnail mode in the View window; however, you can only view the vector formats Corel Presentation Exchange (CMX) and Corel Compressed Exchange (CCX) in Thumbnail mode in the View window. You cannot view the following vector file formats in Thumbnail mode in the View window:

- CorelDRAW (CDR)
- Enhanced Windows Metafile (EMF)
- Windows Metafile (WMF)
- Corel WordPerfect Graphic (WPG)

To view items as thumbnails

- Click View, Thumbnail.

Resizing thumbnails

You can resize the thumbnails to make them appear larger or smaller. You can choose a preset size for your thumbnails, or you can create a custom size.

To resize thumbnails

1. Click View, Thumbnail Size.
2. Choose a size from the Size box.

To specify a custom size for thumbnails

1. Click View, Thumbnail Size.
2. Type a number in the Width box.
3. Click OK.

Note

- The number you type in the Width box is the width and height of your thumbnails in pixels.
