

# Wired for Sound Pro CD 3.10

## Install Notes

### To install Wired for Sound Pro CD:

Choose Run from the File menu of Program Manager.  
Type *r:\SETUP*, where *r* is the drive letter of your CD-ROM drive.  
Press OK.

Although Wired for Sound Pro CD does not require a sound board, it is *strongly recommended* that you get one. Even Setup will sound better with a Windows-compatible sound card installed!

### *Note:*

Wired for Sound Pro CD must be installed from within Windows 3.1 (or compatible operating environment). Setup cannot be run from the DOS command prompt.

To access help in most Wired for Sound Pro CD applications, simply press F1.

Please refer to the Read Me file (README.WRI on the CD-ROM) for last-minute changes and clarifications.
