Chapter 1

AVProgAddress

1.1   Contact them directly!

```
                  This is a part of the  "Amiga Virus Bible"
      and is ment to be used with
                        - and started from -
                          "AVB.Guide"

                        AVB Main-menu

If you come across a new unknown virus...

          ...and don't know
               what to do?
                If you choose to register a shareware anti-virus program...
If you just want to send a word of thanks...

          ...then
               contact the programmer directly!
```

1.2   addr

```
Here are the people to contact:

BOOTX "RECOG"
-------------
SAFE HEX INTERNATIONAL
Att: Erik Loevendahl Soerensen
Snaphanevej 10
DK-4720 Praestoe
DENMARK

VIRUS CHECKER
-------------
John Veldthuis
21 Ngatai Street
Manaia, Taranaki
NEW ZEALAND
```

```
VIRUS INTERCEPTOR
-----------------
Johan Eliasson
Bäckgatan 6
60358 Norrköping
SWEDEN

VIRUS SCANNER
-------------
Gabriele Greco
Via Banchi 12
I-16030 Uscio (GE)
ITALY

VIRUS TERMINATOR
----------------
Heiner Schneegold
Am Steinert 8
W-8701 Eibelstadt
GERMANY

VIRUS WORKSHOP
--------------
Markus Schmall
von Gravemeyerweg 25
30539 Hannover/Bemerode
GERMANY

VIRUSZ II
---------
Georg Hörmann
Am Lahnewiesgraben 19
82467 Garmisch-Partenkirchen
GERMANY
```

1.3 Got a new virus?

```
                          WHERE TO SEND NEW VIRUSES

Send  new viruses to the authors themselves.  This is the best way to show
your  thanks  to the authors for making a program that saved your computer
from possible infection.  We have a list in this file containing the names
and addresses of the
               Anti-Virus Programmers
                 .

Or,  if you do not want to spend extra money on overseas postage, send new
viruses to members of AMIGA  VIRUS  CONTROL, or to a Virus Center who will
then forward the viruses to the authors.

DO  NOT  UPLOAD  new  viruses  to bulletin boards where members of AVC are
located.  In  fact,  DO  NOT  UPLOAD VIRUSES ANYWHERE.  This  is  VERY
dangerous,  and  most  System  Operators  (SysOps) will not appreciate it.
```

This taken into consideration, I will point out that some BBS's have a
special restricted area where you can upload new viruses, and on some
systems you'll even get extra high credit if the virus is new!

VIRUSES WANTED

Amiga Virus Control and the Regional Virus Centers are looking for the
viruses wanted by the different programmers (see the doc on your favorite
virus killer), and any new viruses you might encounter.

Please mark the disk "Attention Virus" (to take care of our hard drives)!
Also state your name and address if you wish a reply, but you can also
choose to remain COMPLETELY ANONYMOUS if you like...ONLY THE VIRUS COUNTS.
WE DON'T CARE what disk the virus comes on, because once it is analyzed
the disks are wiped clean along with your name.
