1.1   VIRUSES - K

                        This is a part of the "Amiga Virus Bible"
        and is ment to be used with – and started from –
                                AVB.Guide

                Kefrens

                Killed

1.2   kefrens.txt

```
======== Computer Virus Catalog 1.2: KEFRENS Virus (20-FEB-1993) =======
Entry...............: KEFRENS virus
Alias(es)...........: SCA-KEFRENS virus
Virus Strain........: SCA virus strain
Virus detected when.: ---
            where.: ---
Classification......: System virus (bootblock), resident
Length of Virus.....: 1. Length on storage medium: 1024 byte
                      2. Length in RAM:            1024 byte
-------------------- Preconditions ----------------------------------
Operating System(s).: AMIGA-DOS
Version/Release.....: 1.2/all, 1.3/all, 2.0/all
Computer model(s)...: All models
-------------------- Attributes -------------------------------------
Easy Identification.: Typical text:
                "A!SCA!SCA!SCA!SCA!SCA!SCA!SCA!r! STARFIRE/NORTH STAR"
Type of infection...: Self-identification method: testing 3rd longword
                                      for matching string "CHW!"
                      System infection: RAM resident, reset resident,
                                      bootblock
Infection Trigger...: Reset
Storage media affected: Only floppy disks (3.5" and 5.25")
Interrupts hooked...: ---
Damage..............: Permanent damage: overwriting bootblock
```

```
                     Transient damage: screen buffer manipulation:
                                       screen becomes black, message
                                       (see above) is shown by
                                       fading in and out pieces of it.
Damage Trigger......: Permanent damage: reset
                      Transient damage: 15th infection.
Particularities.....: Any resident program using the CoolCaptureVector
                         is shutdown, also those using ColdCaptureVector
                         when virus is shutdown by its 'suicide' function.
Similarities........: SCA virus family
-------------------- Agents ---------------------------------------------
Countermeasures.....: VirusZ 3.00, VT 2.48, BootX 5.23
Countermeasures successful: VirusZ 3.00, VT 2.48, BootX 5.23
Standard means......: VT 2.48
-------------------- Acknowledgement ------------------------------------
Location............: Virus Test Center, University Hamburg, FRG
Classification by...: Jens Vogler
Documentation by....: Jens Vogler
Date................: 14th December 1992
Information Source..: Virus Analysis
==================== End of KEFRENS Virus ==============================
```

1.3 killed

```
    Name          : Killed

    Aliases       :

    Type/Size     : Boot virus/ 1024 bytes

    Incidence     : -

    Discovered    : -

    Way to infect: See below

    Rating        : Dangerous

    Kickstarts    : 2.04 too!

    Damage        : Overwrites bootblock

    Manifestation: DisplayAlert

    Removal       : Install the virus bootblock

    Comments      : In  the bootblock you can read "Killed copy xx" in ASC
                    II  text.  After  infection  you  will  get  a  graphic
                    message at a white background saying:

                    "Killed:

    ATTENTION     : This  nasty  boot  virus can infect your harddisk too,
```

so please be very carefull!!

See the screendump of the {" Killed " system SD/Killed} virus!
