Creative Graphic CD

BLASTER™ CD

CREATIVE
CREATIVE LABS

Congratulations!

You now have the most powerful set of image processing tools at your fingertips. All of these applications have been provided to offer a powerful suite of applications for creating, editing, finishing and morphing graphics and images.

Aldus Photostyler SE 2.0
HSC Digital Morph
Aldus Gallery Effects Vol 1
HSC Kai's Power Tools

Note that these applications will display best with a true color graphics card set to at least 32k colors. These applications on the Creative Graphic CD can easily be installed with the following simple instructions. Note that, we recommend you install to Altamira Composer and Aldus Photostyler before Kai's Power Tools and Aldus Gallery Effects. This will ensure that these powerful filters and extensions can be added to these applications with ease.
