Symbols: Mark the Site

Solve problems in your design with **Symbols**. Label your site for issues like wind direction, noise problems, and eyesores that you want to hide, as well as views you want to emphasize.

Use the **Visible Layers** button to turn off the symbols in Top View.

Note: These symbols will not show up in 3D View.

<<GUIDE buffering_noise>> "Buffering Noise" <<END>>
<<GUIDE buffering_wind>> "Buffering Wind" <<END>>
